One platform to *run and grow* your business.

SupplierAdvisor® is the supply-chain operating system with a verified trade and trust layer. Suppliers, customers, orders, stock, money and compliance live in one company workspace, with counterparties you can check and score.

B2B

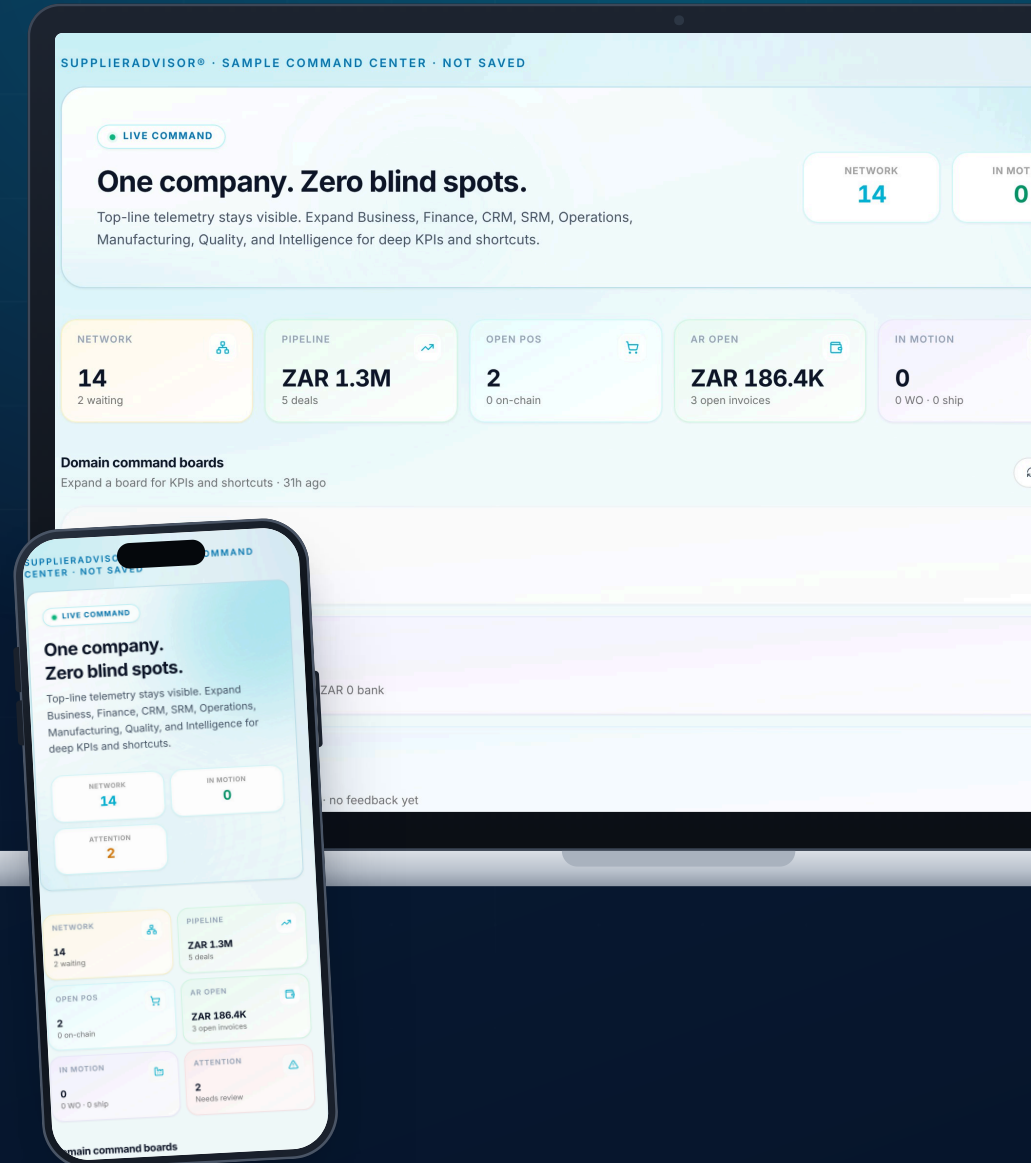

Manufacturers, distributors, brands and trades

B2G

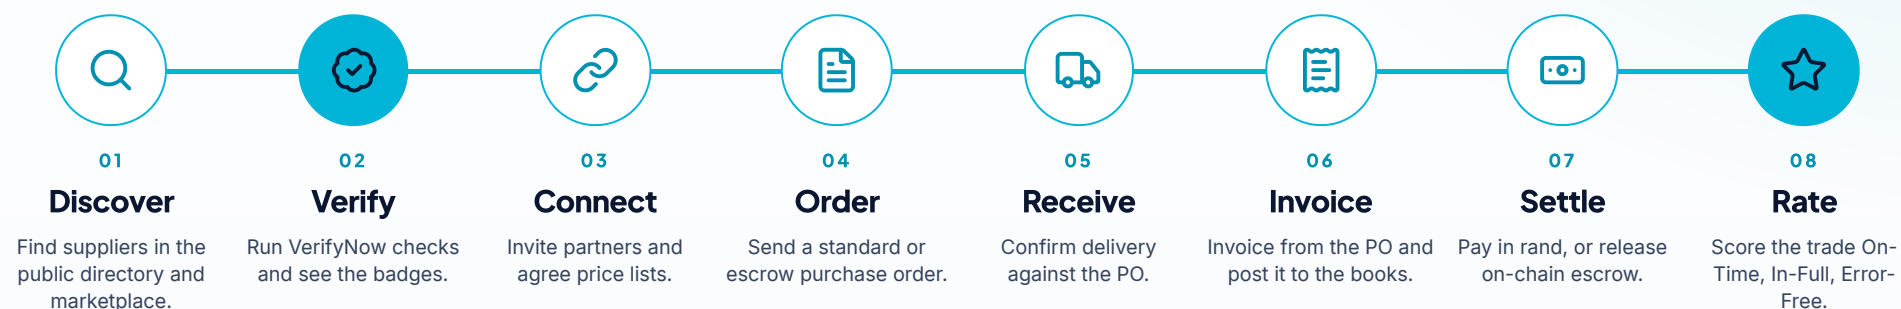

Government programmes with audit-ready packs

B2C

Industry apps, storefronts and tills

The whole trade loop on one workspace, *with trust built in.*

Company check

Paid VerifyNow checks against CIPC, Home Affairs, AML/PEP lists and bank accounts, shown as badges.

OTIFEF scorecard

Every trade can be rated On-Time, In-Full and Error-Free, building a scorecard over time.

RIAD on the relationship

A shared log of Risks, Issues, Actions and Decisions for each customer and supplier.

Everything a company needs, *in every plan.*

Every company gets the same core operating system on the base plan. It's priced per company, not per seat, so the whole team is in.

Profile and verification

A company profile buyers trust, with VerifyNow badges, team roles and several workspaces under one login.

Network and connections

Invite the partners you trade with, agree price lists, and earn referral fees on their subscriptions.

Suppliers and marketplace

A supplier book with dossiers, contracts, ratings and RIAD, plus a public directory and marketplace.

Purchase orders and escrow

Standard or escrow POs, a buyer portal, and an inbound inbox where sellers accept or decline.

Inventory

Raw materials, finished goods, lots, warehouses, transfers, counts, scanning and GS1 data.

Accounting and finance

Bank reconciliation, live management accounts, VAT, P&L, balance sheet, cash flow and AFS.

Customers and credit

Leads, quotes, orders and invoices, credit applications, AR aging and reminders.

SHEQ and quality

QA inspections, holds and release, OH&S and NCR/CAPA on the same books.

Intelligence and SAM

Pulse insights, scorecards and forecasts, and SAM, the assistant that shows you how.

Buy from suppliers *you can prove.*

Find suppliers in the public directory, check their badges and ratings, then send a purchase order from their catalogue. They accept it in their inbound inbox, and you track it to delivery.

Directory and marketplace

Search by industry, city and country, shortlist suppliers and open a full profile dossier.

Supplier book (SRM)

Documents, contracts, performance, ratings and the RIAD log in one place.

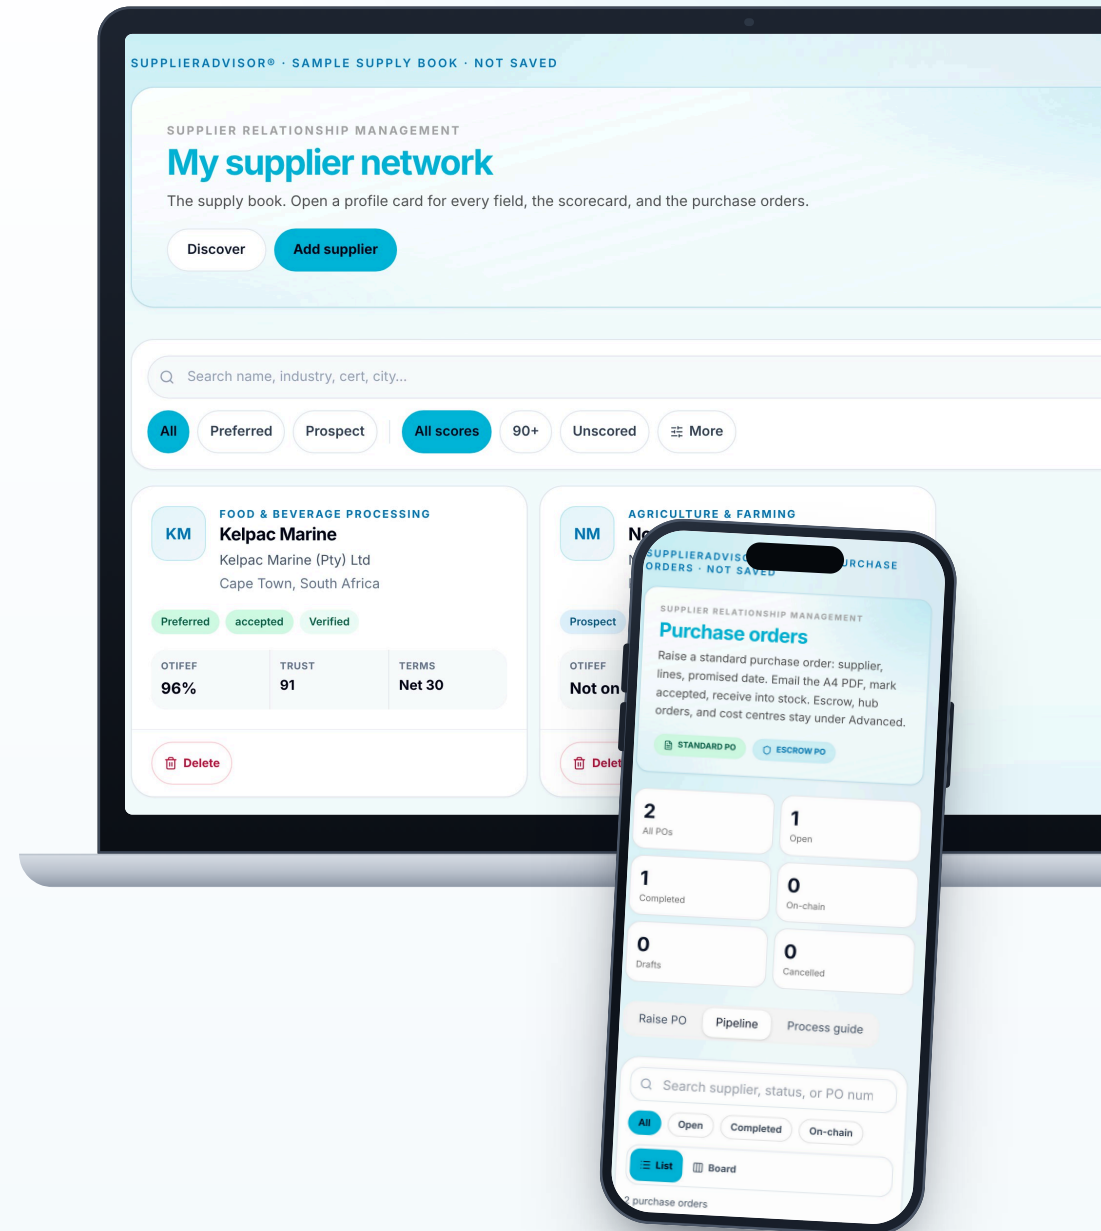

Standard or escrow PO

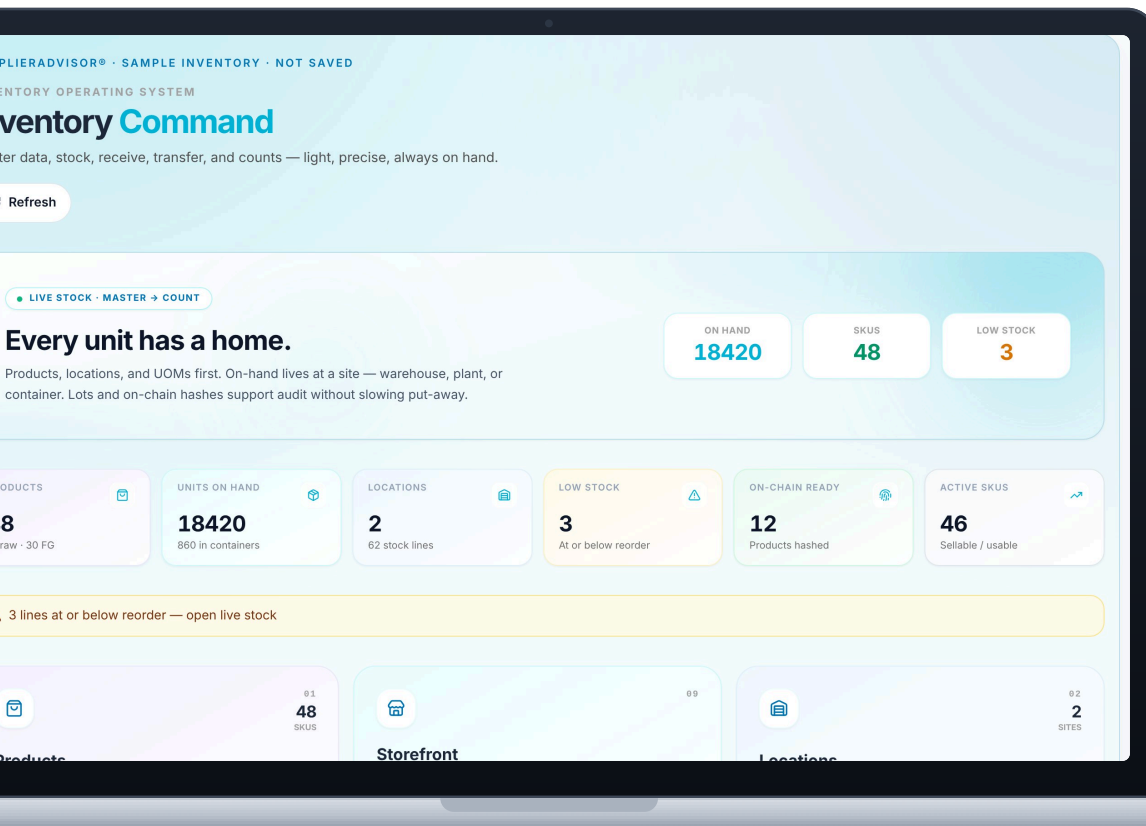

Lines from the supplier's catalogue or agreed price list, with a promised date.

Email and push alerts

Inbound, accepted, invoiced and fulfilment events reach the right people.

INVENTORY

Stock that *follows the trade.*

Goods land in warehouses by lot when a purchase order is received, and move out on sales, transfers and production. Every movement has a place in the books.

Inventory by lot and warehouse

Products, locations and units first, then on-hand by site, lot and container.

Counts and scanning

Transfers, stock takes, cycle counts, barcode scanning, EDI and GS1 helpers.

Purchase orders to stock

Receive against the PO, and the supplier invoice posts to accounts payable.

Cost of sales in the ledger

Stock costs flow to cost of sales, so gross profit in the reports is real.

Know your numbers *today, not at month-end.*

Sales, purchases, stock and the bank all post to one general ledger, so the management accounts are live for any period you pick: revenue through gross profit to operating profit, with the bank beside it.

Bank and reconciliation

Live management reports

VAT and the VAT return

Financial statements

- ✓ Period P&L bridge, expense mix and budget vs actual
- ✓ Ratios: margins, current and quick ratio, debt to equity, ROA and ROE
- ✓ Forecasts, AR and AP aging, and a management cash flow against budget
- ✓ One click to a management pack PDF for the board or the bank

SUPPLIERADVISOR® · ACCOUNTING

Management accounts

ILLUSTRATION · SAMPLE DATA

BANK INTEGRATION AND RECONCILIATION

The bank, *coded for you.*

SupplierAdvisor® is connected with FNB. FNB transactions and imported statement lines land in one allocation queue.

Proposals learn from how you post journals and VAT, then you post or change the account.

Statement import

Bring in bank statements as PDF, CSV or OFX, for as many accounts as you run.

Auto-match

Scores unallocated lines against open invoices, bills and your rules.

Settle AR and AP in one step

A matched receipt or payment clears the invoice and posts to the ledger.

Bank vs ledger, always visible

Set statement balances any time and see what is still unallocated.

Connected with FNB

FNB transactions come into the same allocation queue, ready to reconcile.

CONNECTED BANKS

FNB

● **Connected** Other banks to follow. Until then, import statements.

VAT you can *stand* behind.

Invoices, bills and bank lines carry a South African VAT code, so the VAT return box builds itself for the period you choose: output VAT, input VAT and the amount payable to SARS or the refund due.

- South African VAT codes**

Standard rate 15%, zero-rated, exempt and out of scope, set up for you.
- VAT return box**

Standard-rated sales and purchases, zero-rated and exempt supplies, and net VAT: the figures for your VAT201.
- Find and fix wrong codes**

Filter every VAT line by type and reallocate a wrong code before you file.
- Submit the VAT201 to SARS eFiling**

LAUNCHING SOON

File the return from SupplierAdvisor®.

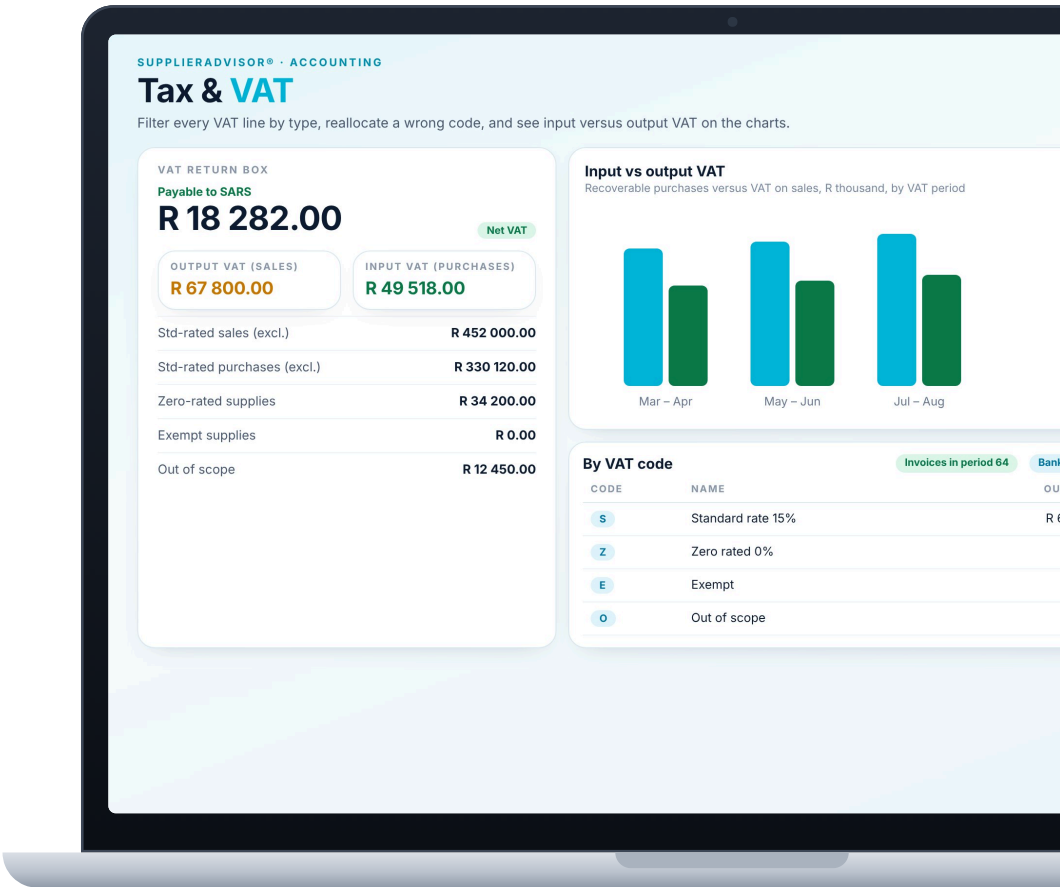

ILLUSTRATION · SAMPLE DATA

Year-end, *without the scramble.*

The statements come straight from posted journals, so they are ready when your accountant asks.

Profit or loss

Revenue through net profit, for any period, with comparatives.

Balance sheet

IAS 1 statement of financial position at the period end, with working capital.

Cash flow

IAS 7 direct method from the cash and bank ledger, with the reconciliation of profit to operating cash.

Annual financial statements

An IFRS-oriented AFS pack: financial position, profit or loss and OCI, changes in equity, cash flows, notes and policies.

Also in the box: trial balance, period locks, year-end close to retained earnings, IFRS 9 credit-loss allowance and multi-entity books. Statements are marked unaudited; your auditor signs off.

Illustration · sample data from a fictional company.

Sell more, *collect faster.*

Leads, quotes, orders and invoices sit on one customer record. Trade credit and overdue reminders keep cash moving, and SAM is on hand when you're stuck.

CRM with a 360° view

Leads, enquiries, quotes, orders, contracts, claims, loyalty and ratings for each customer.

Trade credit applications

From draft to approved or declined. Approval sets the customer's credit limit.

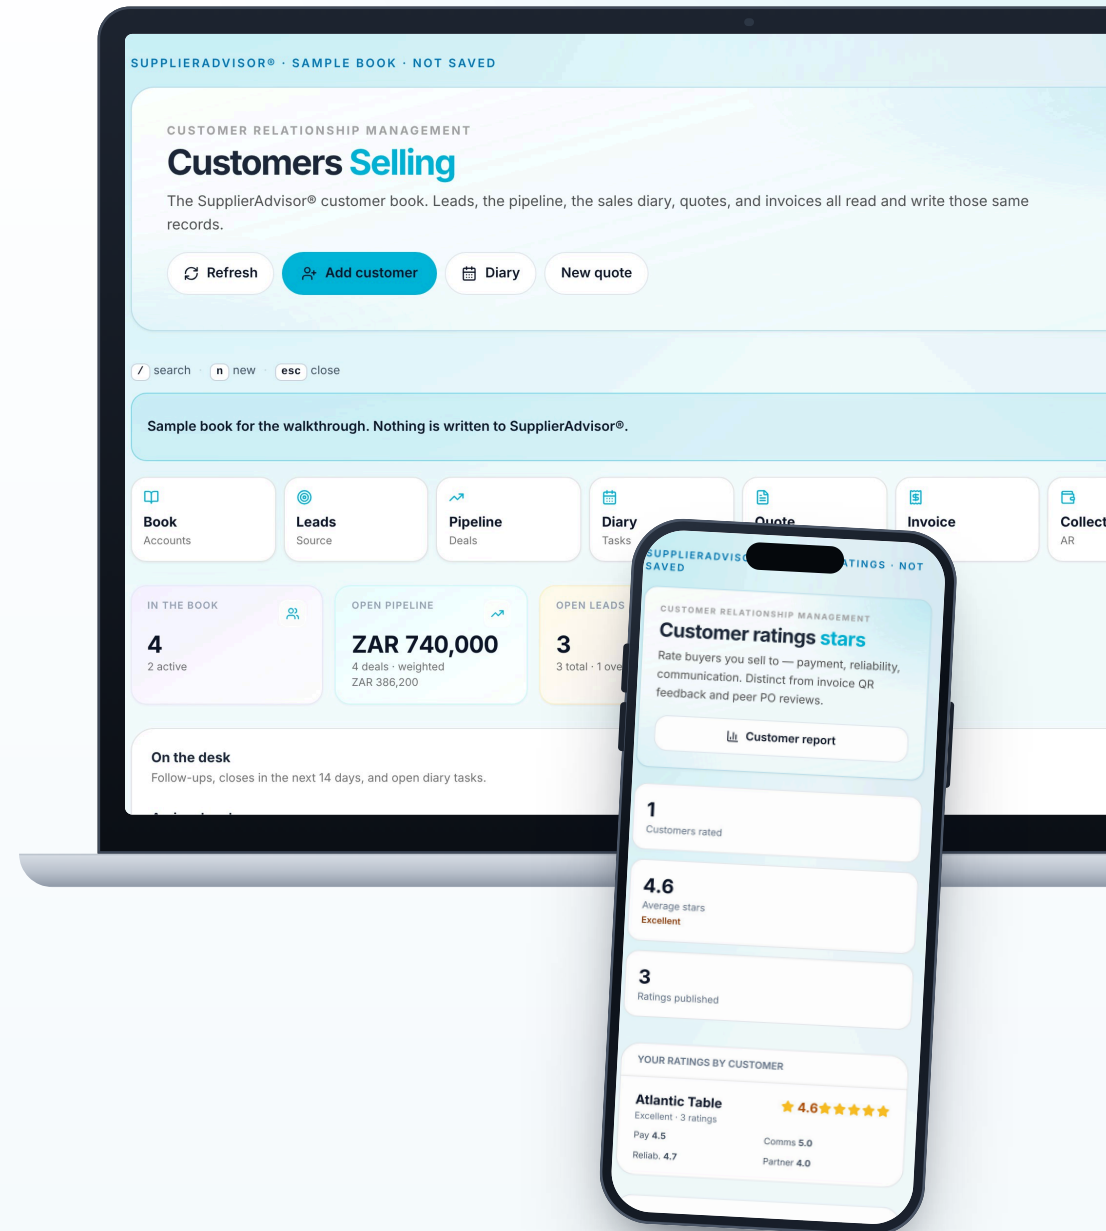

AR aging and reminders

From current to 90+ days, partial payments, and reminders by email or WhatsApp.

SAM assistant and insights

Rule-based insights with clear thresholds. SAM answers how-to questions and links to the right screen.

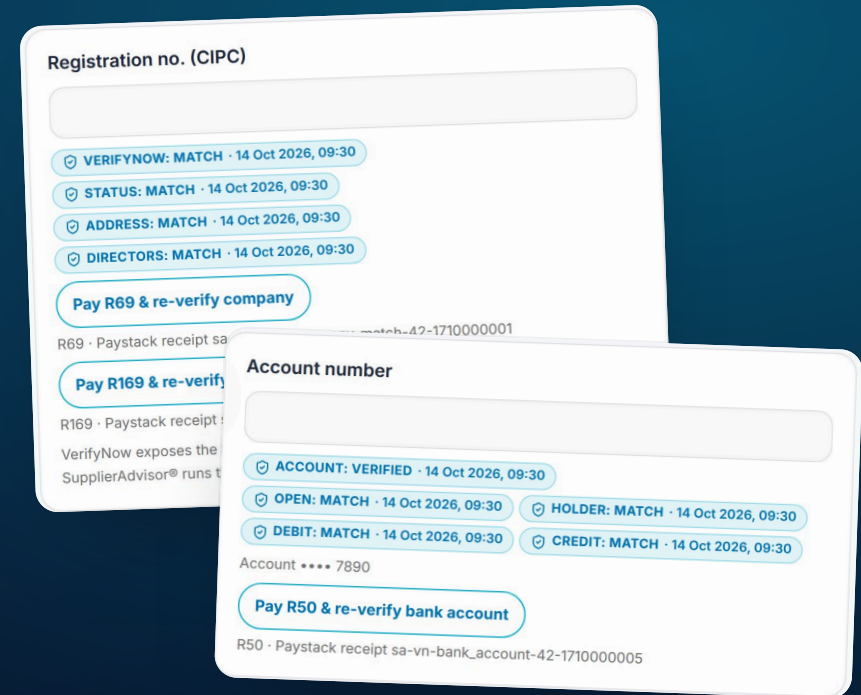

Trust you can *show*.

SupplierAdvisor® uses VerifyNow, a South African verification provider. You pay per check through Paystack, the check runs, and the badge and receipt are saved on the profile.

CIPC company match	Name, registration status, address and directors	R69
CIPC director search	Directors on record; VAT cross-check	R69
Director SA ID	Home Affairs check of a South African ID	R15
AML, PEP and sanctions	Screens a name against watch lists	R15
Company bank account	Account open, holder, accepts debits and credits	R50
Capitec Business / Mercantile	Business bank check by signed callback	R55
Supplier Bundle	Company + directors + AML/PEP + bank (list R203)	R169
Supplier Bundle, Capitec bank	As above with the Capitec check (list R208)	R179

Prices are VAT inclusive, per check. Personal checks (ID, AML/PEP) need recorded POPIA consent first.

Verified badges with their Paystack receipts on a company profile.

Two ways to move money, *both on the record.*

Paystack, in rand

- ✓ Subscriptions and prepaid terms
- ✓ VerifyNow checks, paid one at a time
- ✓ Invoice pay links that clients open in the industry apps
- ✓ Paystack's signature is checked before any action

Optional on-chain escrow

- ✓ Chosen per purchase order: send an escrow PO
- ✓ USDC, a dollar stablecoin, held by a smart contract
- ✓ The supplier is paid when the buyer confirms delivery
- ✓ Rand settlement stays the default for South African trade

THE ESCROW PURCHASE ORDER, IN FIVE STEPS

It works like a trust account run by code: every step leaves a tamper-evident record.

Your business, *on their home screen.*

Industry packs come with installable web apps (PWAs). No app store: open the link and add it to the home screen. Each one reads from the same company books.

 **TradeAdvisor®**
Owner, technician and client apps. Clients follow the job, sign quotes and pay invoices.

 **GymAdvisor®**
Member app: classes, progress and account.

 **Clinic packs**
Patient apps to book, see the diary, and follow rehab, charts, records or pets.

 **RetailAdvisor®**
Shoppers pay at the till by QR or tap on the SA Member app.

 **ApparelAdvisor®**
A buyer app for wholesale ranges and available-to-sell stock.

Clients pay invoices in the app.

The TradeAdvisor® client app shows the statement balance and every invoice, and clients pay issued invoices in the app with Apple Pay, card or EFT through Paystack.

TradeAdvisor® client and owner apps · sample book, fictional business

Locked down *by design.*

Security is layered, so no single control carries the load. Every request passes each layer before it touches company data.

Edge and transport HTTPS, an enforced Content-Security-Policy and rate limits on sensitive APIs.

Identity Privy sign-in by email, Google, Apple or wallet. Every API call carries a verified token.

Tenancy Company membership is checked on the server, and every query is scoped to that company.

Role permissions Eight roles, from owner to sales contractor. Critical writes need named roles.

Database Row-level security on every table. Browser keys get no direct access.

Audit and monitoring Sensitive actions go to an activity log, with health checks for operations.

Built for POPIA

The Protection of Personal Information Act asks that personal data is processed lawfully, kept secure and seen only by the right people.

Consent

Personal checks will not run without recorded POPIA consent.

Need to know

Company-scoped data, a role matrix, and Finance limited to owner and finance roles.

Minimal exposure

Only a short list of public routes answers without sign-in.

Safeguards

Signed webhooks and share links, server-only keys, and rate limits.

Sector depth, *same core.*

Switch on a pack from Company → Modules for +R199 a month each. Government programmes are set up by administrators. Practice and trade fees stay with your business.

02

PART 2

QuarryAdvisor® *for quarries and aggregates.*

The full showcase: the problems it solves, every feature, a day across the pit network, and what it costs.

Hard rock. *Messy* records.

Most quarries run weighbridge tickets, plant logs, fuel books and permits on separate paper trails. QuarryAdvisor® puts the pit network on one system.

“Weighbridge tickets don’t connect to production.”

THE FIX Tickets link to a stockpile, so net tonnes come off the pad balance fed by plant runs.

“Temp pads and batching plants are off the main system.”

THE FIX Permanent and temporary quarries and project batching plants with GPS on one register.

“Fleet fuel and R/t only live in paper logs.”

THE FIX L/h, L/km, R/km and R/t per vehicle from the registry.

“Assembling permits and QA for auditors takes weeks.”

THE FIX Lab results with pass/fail and permits with expiry status from dates.

“We don’t know how many tonnes are really left.”

THE FIX Surveyed and approved recoverable reserves by site, product and season.

“Production plans don’t match project dates.”

THE FIX A production sequence with daily tonne allocation against project dates.

From the face to *the weighbridge*, on one system.

QuarryAdvisor® is the multi-quarry aggregates OS inside SupplierAdvisor®: quarries, pits, reserves, production, plant, weighbridge, vehicle KPIs, labour, lab QA and permits, with management reports by quarry and fleet.

Core

Quarries, sites and faces, products and reserves.

Operations

Production, plant, dispatch, vehicles and labour.

Assure

Lab quality, compliance and the management report.

R199 /month

QuarryAdvisor® pack on top of the SupplierAdvisor® core plan

G1–G7

Aggregate grades plus concrete stone and crusher sand

4 fleet KPIs

L/h, L/km, R/km and R/t

∞ users

Priced per company, so every site is included

Seven steps. *One* tonne trail.

Every tonne follows the same trail, from the surveyed reserve to the weighbridge ticket and the management report.

Every pit, pad and plant *on one map.*

Register permanent quarries with GPS, and temporary quarries and project batching plants under Locations. Allocate vehicles, crews and plant to each site, and pits, plant and fleet still roll up.

Permanent quarries

Registered with GPS coordinates.

Temporary pads and batching plants

Project sites on the same network.

Sites and faces

Pits, borrow pads and plant yards as the master.

Allocate resources

Vehicles, crews and plant to each location.

Know what's left *in the ground.*

Aggregate grades from G1 to G7, concrete stone and crusher sand are used by reserves, plant, stockpiles and dispatch. Surveyed and approved recoverable tonnes by site, product and season feed production planning.

Products and grades

G1–G7, concrete stone, crusher sand and more.

Recoverable reserves

Surveyed and approved tonnes.

By season

Revise as the survey changes.

Feeds the plan

Reserves drive production planning.

A season of production, sequenced.

Sequence sites and products and set the daily tonne allocation to project dates. Tonnes ÷ daily allocation gives days on production, and the calendar advances for the next row. Blasts are logged against the same site.

Sequence

Sites and products in order.

Daily allocation

Tonnes per day to project dates.

Calendar that walks

Each row starts when the last ends.

Blast log

Against the site master.

From the crusher *to* the stockpile.

Crusher and screen production runs plus stockpile book balances by product, the feed for the weighbridge.

- 
Plant runs
 Crusher and screen hours and tonnes.
- 
Throughput
 Tonnes per hour per unit.
- 
Stockpile balances
 Book balance per product.
- 
Feeds dispatch
 What the weighbridge draws from.

Every ticket *comes off the pad.*

Weighbridge tickets record the customer, vehicle and destination. Linking a stockpile deducts net tonnes from the pad balance, so plant and dispatch always reconcile.

Weighbridge tickets

Customer, vehicle, product and destination.

Linked stockpiles

Net tonnes deducted from the pad.

Printed tickets

For the driver and the customer.

Into the books

Customers and invoicing on the core.

Fuel, kilometres and *the real cost per tonne.*

Key metrics per vehicle: fuel utilisation (L/h, L/km) and cost per kilometre (R/km). Register permanent, temporary and contractor crews with rates and log day costs against sites.

Fuel utilisation

L/h for plant and L/km for haulers.

Cost per kilometre

R/km from fuel, km and rates.

Crews and rates

Permanent, temporary and contractor.

R/t

Fleet and labour per tonne.

Release discipline *and an audit-ready trail.*

Record crushing strength, grading and other lab results against products and sites, with pass/fail for release. Track mining rights, water use licences and EMP/EA, with expiring and expired status from dates.

Lab results

Crushing strength, grading and more.

Pass / fail

Release discipline per product.

Permits

Mining rights, WUL and EMP/EA.

Expiry status

Expiring and expired from the dates.

The pit network *on one page.*

A multi-quarry roll-up with vehicle KPIs, plant vs dispatch balance, labour and compliance. Filter by quarry and fleet, and export CSV.

Multi-quarry roll-up

Production and dispatch by quarry.

Vehicle KPIs

L/h, L/km, R/km and R/t.

Plant vs dispatch

The balance between them.

CSV export

Filter and take it anywhere.

A Monday at *Ridgestone Aggregates.*

An illustrative day with QuarryAdvisor®. Ridgestone Aggregates is a fictional producer with two quarries, a temporary borrow pad and a project batching plant.

- 06:00** ● **Plant**
The primary jaw starts. Plant runs are logged with hours and tonnes against each product.
- 07:30** ○ **Weighbridge**
The first tipper weighs out 32.4 t of G5 base. The ticket deducts it from the North stockpile.
- 09:00** ○ **Mine manager**
Logs a blast on Face B and checks the production sequence against the N4 project dates.
- 10:30** ○ **Lab**
Crusher sand fails on fines. It is marked fail and held from release.
- 12:00** ○ **Fleet**
Tipper TP-14 shows 0.56 L/km and R 14.80/km for the week.
- 14:00** ○ **Compliance**
The water use licence shows as expiring in December. The renewal is started.
- 16:00** ○ **Labour**
Seven crews' day costs are logged against their sites.
- 17:30** ● **Director**
The management report shows plant vs dispatch in balance and R 18.40 per tonne.

Illustrative story. The business, people and amounts are fictional sample data, not a real customer.

From ticket books and logbooks *to one system.*

	Before: ticket books, logbooks, files	With QuarryAdvisor®
Weighbridge	✗ Ticket books	✓ Tickets linked to stockpiles
Sites	✗ Temp pads on a spreadsheet	✓ Every quarry, pad and plant with GPS
Reserves	✗ A survey PDF	✓ Recoverable tonnes by site and season
Production	✗ A whiteboard	✓ Sequenced plan with t/day
Plant	✗ Shift logbooks	✓ Plant runs and stockpile balances
Fleet	✗ Paper fuel logs	✓ L/h, L/km, R/km and R/t
QA and permits	✗ Files for the auditor	✓ Lab pass/fail and permit expiry
Reporting	✗ Month-end spreadsheets	✓ A multi-quarry roll-up with CSV

Built for South African quarries, *on a real business system.*

A weighbridge program stops at the ticket.
QuarryAdvisor® also runs your reserves, plant, fleet,
permits and books on SupplierAdvisor®.

Real accounting underneath

Bank matching, VAT and financial
statements on the core.

Tickets that reconcile

Every ticket deducts from a
stockpile.

Temporary sites included

Borrow pads and batching plants
with GPS.

Fleet KPIs

L/h, L/km, R/km and R/t.

Lab QA

Pass/fail for release.

Permit expiry

Mining rights, WUL and EMP/EA.

Verified suppliers

Fuel, parts and plant with POs.

Priced per company

Unlimited users. Every site and
weighbridge is included.

See it on your own data.

Good questions, *straight answers.*

Book a demo 

Start free trial →

Q Can we run several quarries?

Yes. Register many quarries, sites and faces, plus temporary pads and batching plants, all rolling up to one report.

Q Which grades are supported?

G1 to G7, concrete stone, crusher sand and other products you add, used by reserves, plant, stockpiles and dispatch.

Q Which fleet metrics are there?

Fuel utilisation in L/h and L/km, cost per kilometre in R/km, and cost per tonne.

Q Can we export the report?

Yes. The management report filters by quarry and fleet and exports CSV.

Q Do I need SupplierAdvisor® as well?

Yes. QuarryAdvisor® is an industry pack on the SupplierAdvisor® core plan, which also gives you accounting, suppliers, inventory and SAM.

Q Do weighbridge tickets update stock?

Yes. Linking a stockpile to a ticket deducts the net tonnes from the pad balance.

Q How does the production planner work?

Sequence sites and products and set tonnes per day. Tonnes ÷ daily allocation gives days on production, and the calendar advances.

Q Can we track permits?

Yes. Mining rights, water use licences, EMP/EA and other permits, with expiring and expired status from dates.

Q Is there a mobile app?

QuarryAdvisor® runs in the browser on the SupplierAdvisor® workspace.

Q Is our data safe?

Every API call checks your sign-in and company role on the server, and the database refuses direct browser access.

Your next tonne: planned, crushed and *weighed out*, on one system.

Start a 30-day free trial with full access, no card needed. Switch on QuarryAdvisor® from Company → Modules and register your first quarry today.
