One platform to *run and grow* your business.

SupplierAdvisor® is the supply-chain operating system with a verified trade and trust layer. Suppliers, customers, orders, stock, money and compliance live in one company workspace, with counterparties you can check and score.

B2B

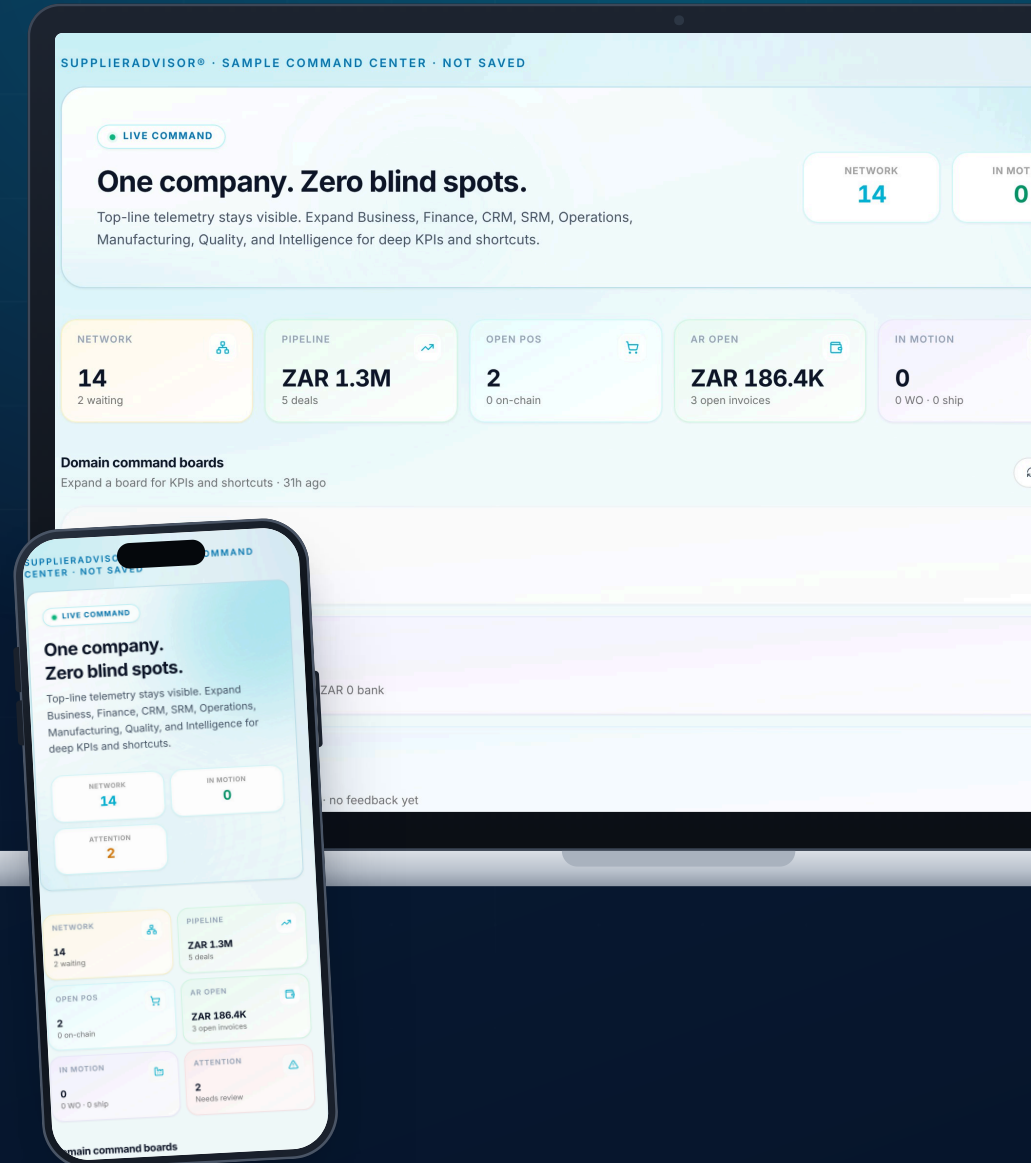

Manufacturers, distributors, brands and trades

B2G

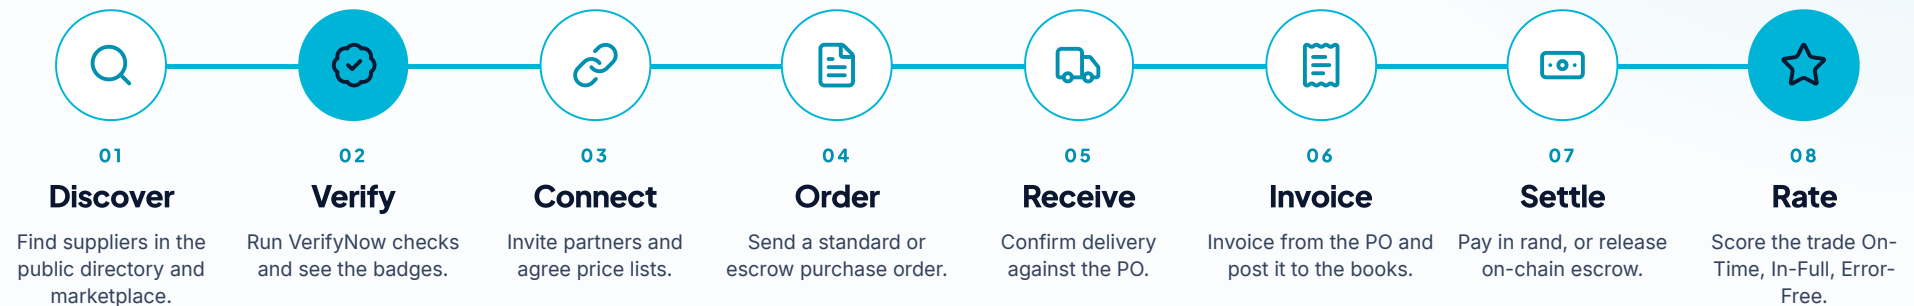

Government programmes with audit-ready packs

B2C

Industry apps, storefronts and tills

The whole trade loop on one workspace, *with trust built in.*

Company check

Paid VerifyNow checks against CIPC, Home Affairs, AML/PEP lists and bank accounts, shown as badges.

OTIFEF scorecard

Every trade can be rated On-Time, In-Full and Error-Free, building a scorecard over time.

RIAD on the relationship

A shared log of Risks, Issues, Actions and Decisions for each customer and supplier.

Everything a company needs, *in every plan.*

Every company gets the same core operating system on the base plan. It's priced per company, not per seat, so the whole team is in.

Profile and verification

A company profile buyers trust, with VerifyNow badges, team roles and several workspaces under one login.

Network and connections

Invite the partners you trade with, agree price lists, and earn referral fees on their subscriptions.

Suppliers and marketplace

A supplier book with dossiers, contracts, ratings and RIAD, plus a public directory and marketplace.

Purchase orders and escrow

Standard or escrow POs, a buyer portal, and an inbound inbox where sellers accept or decline.

Inventory

Raw materials, finished goods, lots, warehouses, transfers, counts, scanning and GS1 data.

Accounting and finance

Bank reconciliation, live management accounts, VAT, P&L, balance sheet, cash flow and AFS.

Customers and credit

Leads, quotes, orders and invoices, credit applications, AR aging and reminders.

SHEQ and quality

QA inspections, holds and release, OH&S and NCR/CAPA on the same books.

Intelligence and SAM

Pulse insights, scorecards and forecasts, and SAM, the assistant that shows you how.

Buy from suppliers *you can prove.*

Find suppliers in the public directory, check their badges and ratings, then send a purchase order from their catalogue. They accept it in their inbound inbox, and you track it to delivery.

Directory and marketplace

Search by industry, city and country, shortlist suppliers and open a full profile dossier.

Supplier book (SRM)

Documents, contracts, performance, ratings and the RIAD log in one place.

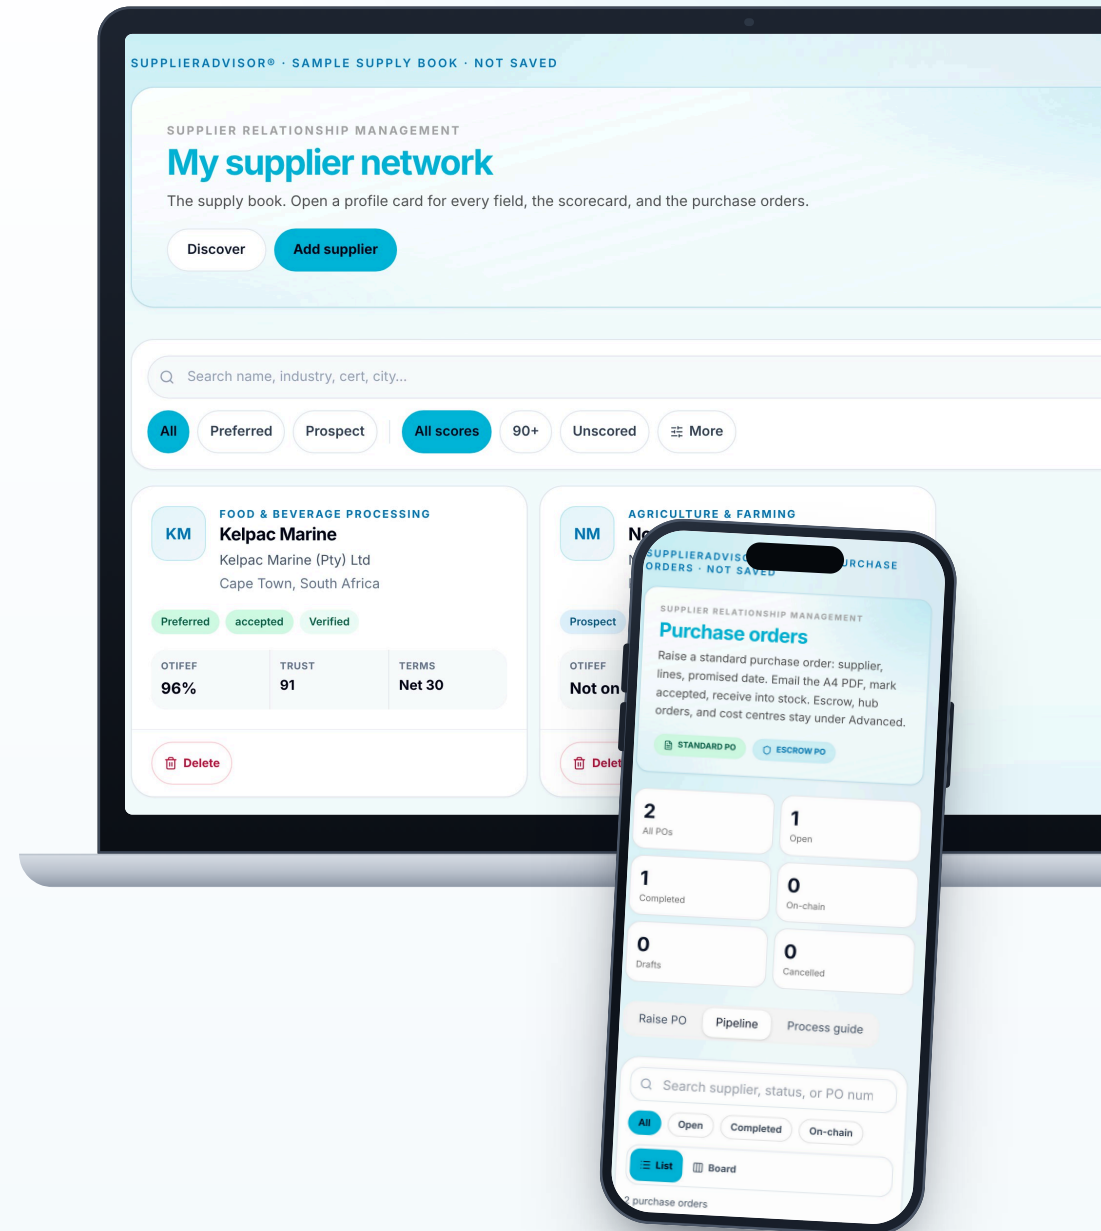

Standard or escrow PO

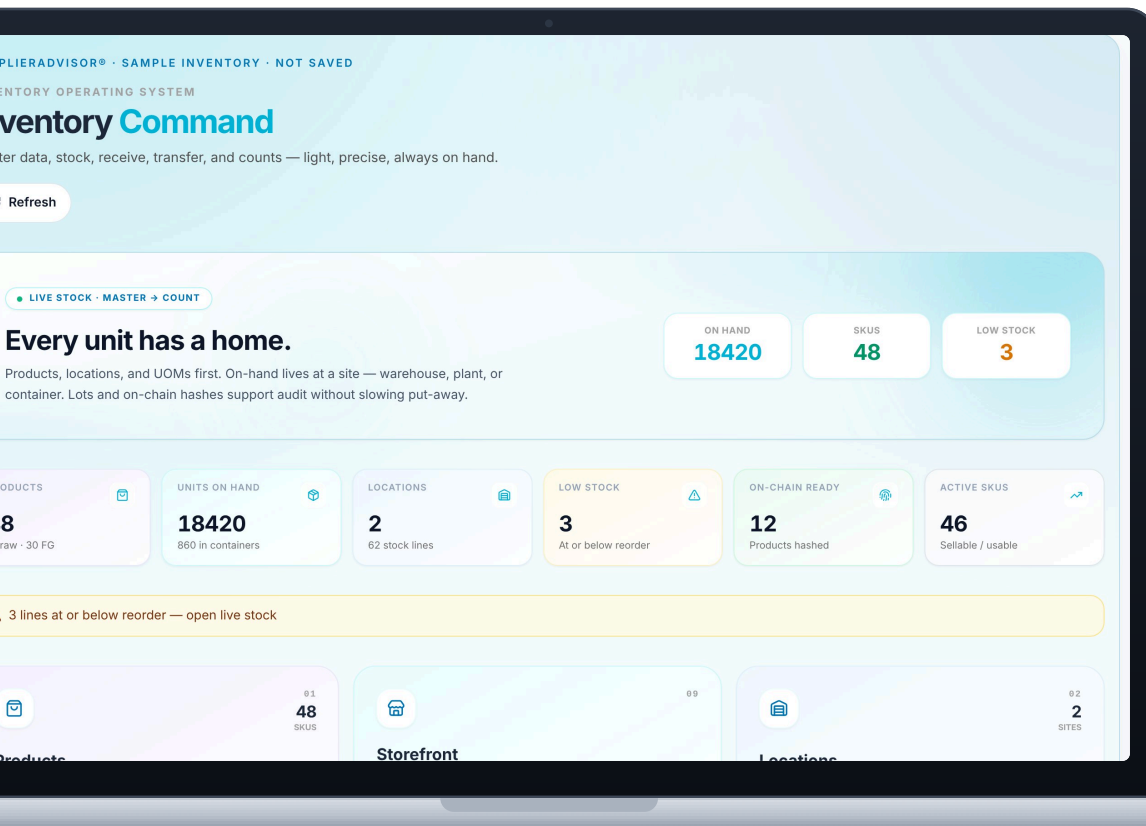

Lines from the supplier's catalogue or agreed price list, with a promised date.

Email and push alerts

Inbound, accepted, invoiced and fulfilment events reach the right people.

INVENTORY

Stock that *follows the trade.*

Goods land in warehouses by lot when a purchase order is received, and move out on sales, transfers and production. Every movement has a place in the books.

Inventory by lot and warehouse

Products, locations and units first, then on-hand by site, lot and container.

Counts and scanning

Transfers, stock takes, cycle counts, barcode scanning, EDI and GS1 helpers.

Purchase orders to stock

Receive against the PO, and the supplier invoice posts to accounts payable.

Cost of sales in the ledger

Stock costs flow to cost of sales, so gross profit in the reports is real.

Know your numbers *today, not at month-end.*

Sales, purchases, stock and the bank all post to one general ledger, so the management accounts are live for any period you pick: revenue through gross profit to operating profit, with the bank beside it.

Bank and reconciliation

Live management reports

VAT and the VAT return

Financial statements

- ✓ Period P&L bridge, expense mix and budget vs actual
- ✓ Ratios: margins, current and quick ratio, debt to equity, ROA and ROE
- ✓ Forecasts, AR and AP aging, and a management cash flow against budget
- ✓ One click to a management pack PDF for the board or the bank

SUPPLIERADVISOR® · ACCOUNTING

ILLUSTRATION · SAMPLE DATA

BANK INTEGRATION AND RECONCILIATION

The bank, *coded for you.*

SupplierAdvisor® is connected with FNB. FNB transactions and imported statement lines land in one allocation queue.

Proposals learn from how you post journals and VAT, then you post or change the account.

Statement import

Bring in bank statements as PDF, CSV or OFX, for as many accounts as you run.

Auto-match

Scores unallocated lines against open invoices, bills and your rules.

Settle AR and AP in one step

A matched receipt or payment clears the invoice and posts to the ledger.

Bank vs ledger, always visible

Set statement balances any time and see what is still unallocated.

Connected with FNB

FNB transactions come into the same allocation queue, ready to reconcile.

CONNECTED BANKS

FNB

● **Connected**

Other banks to follow. Until then, import statements.

VAT you can *stand* behind.

Invoices, bills and bank lines carry a South African VAT code, so the VAT return box builds itself for the period you choose: output VAT, input VAT and the amount payable to SARS or the refund due.

South African VAT codes

Standard rate 15%, zero-rated, exempt and out of scope, set up for you.

VAT return box

Standard-rated sales and purchases, zero-rated and exempt supplies, and net VAT: the figures for your VAT201.

Find and fix wrong codes

Filter every VAT line by type and reallocate a wrong code before you file.

Submit the VAT201 to SARS eFiling

LAUNCHING SOON

File the return from SupplierAdvisor®.

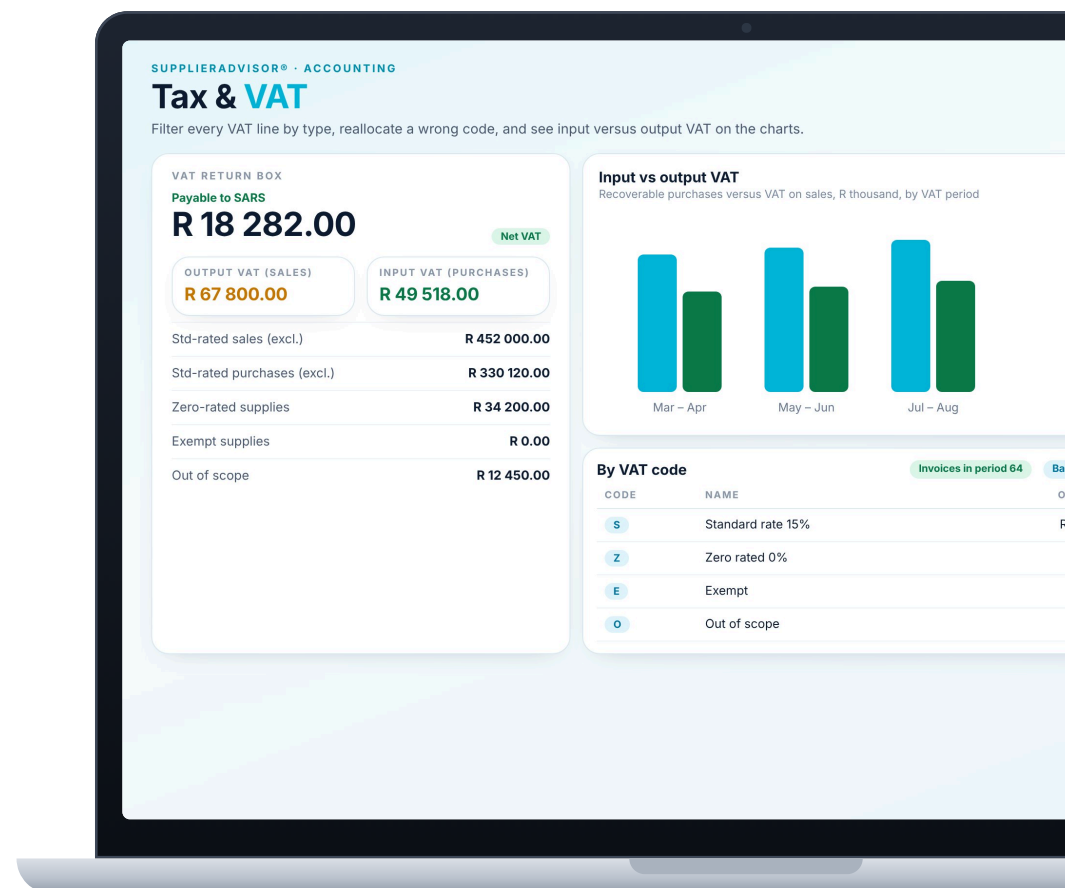

ILLUSTRATION · SAMPLE DATA

Year-end, *without the scramble.*

The statements come straight from posted journals, so they are ready when your accountant asks.

Profit or loss

Revenue through net profit, for any period, with comparatives.

Balance sheet

IAS 1 statement of financial position at the period end, with working capital.

Cash flow

IAS 7 direct method from the cash and bank ledger, with the reconciliation of profit to operating cash.

Annual financial statements

An IFRS-oriented AFS pack: financial position, profit or loss and OCI, changes in equity, cash flows, notes and policies.

Also in the box: trial balance, period locks, year-end close to retained earnings, IFRS 9 credit-loss allowance and multi-entity books. Statements are marked unaudited; your auditor signs off.

ILLUSTRATION · SAMPLE DATA

Cash at the end of the year	248 912

Illustration · sample data from a fictional company.

Sell more, *collect faster.*

Leads, quotes, orders and invoices sit on one customer record. Trade credit and overdue reminders keep cash moving, and SAM is on hand when you're stuck.

CRM with a 360° view

Leads, enquiries, quotes, orders, contracts, claims, loyalty and ratings for each customer.

Trade credit applications

From draft to approved or declined. Approval sets the customer's credit limit.

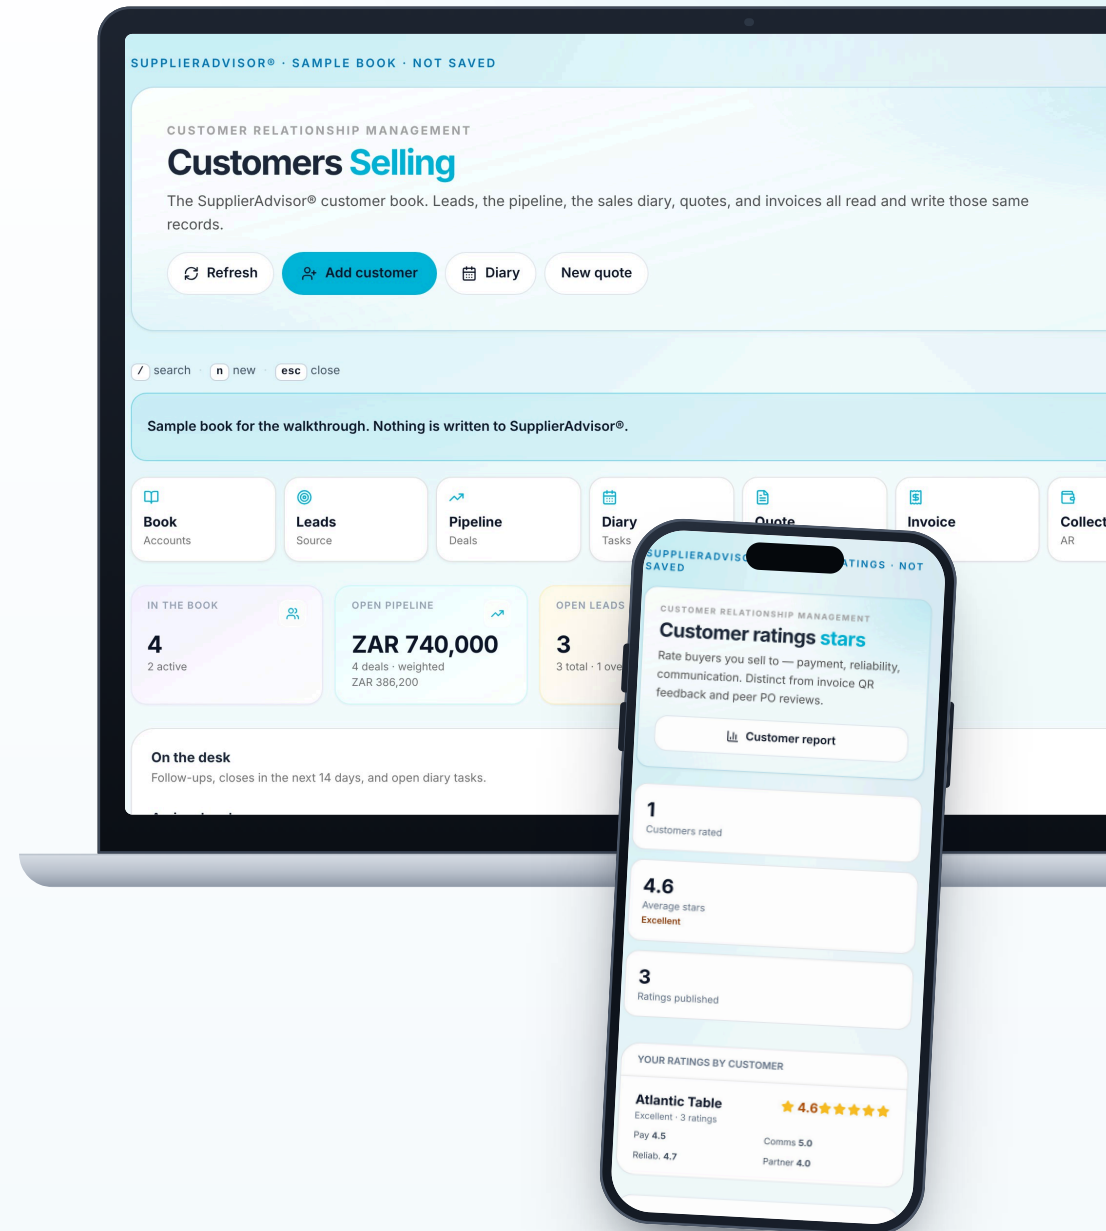

AR aging and reminders

From current to 90+ days, partial payments, and reminders by email or WhatsApp.

SAM assistant and insights

Rule-based insights with clear thresholds. SAM answers how-to questions and links to the right screen.

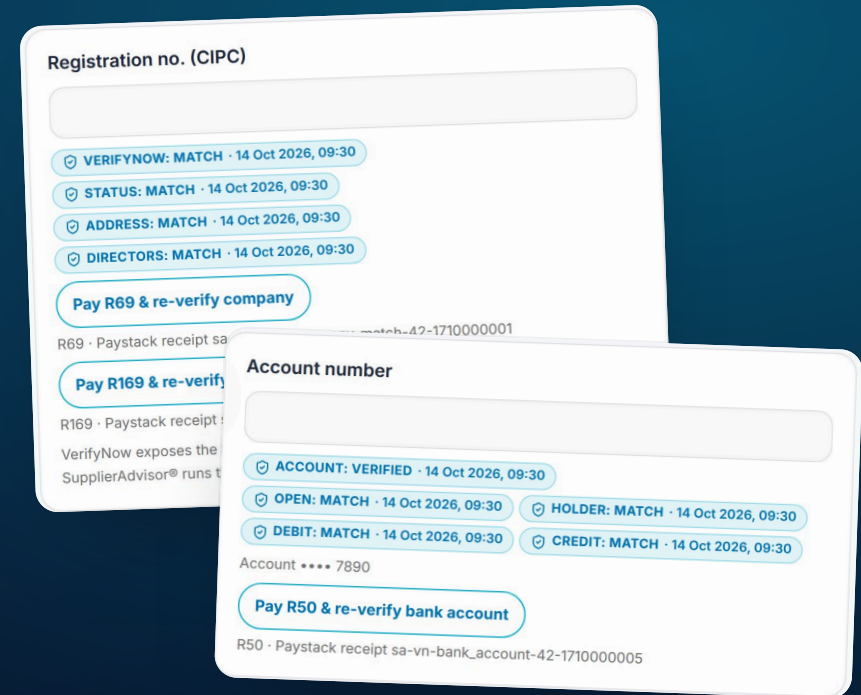

Trust you can *show*.

SupplierAdvisor® uses VerifyNow, a South African verification provider. You pay per check through Paystack, the check runs, and the badge and receipt are saved on the profile.

CIPC company match	Name, registration status, address and directors	R69
CIPC director search	Directors on record; VAT cross-check	R69
Director SA ID	Home Affairs check of a South African ID	R15
AML, PEP and sanctions	Screens a name against watch lists	R15
Company bank account	Account open, holder, accepts debits and credits	R50
Capitec Business / Mercantile	Business bank check by signed callback	R55
Supplier Bundle	Company + directors + AML/PEP + bank (list R203)	R169
Supplier Bundle, Capitec bank	As above with the Capitec check (list R208)	R179

Prices are VAT inclusive, per check. Personal checks (ID, AML/PEP) need recorded POPIA consent first.

Verified badges with their Paystack receipts on a company profile.

Two ways to move money, *both on the record.*

Paystack, in rand

- ✓ Subscriptions and prepaid terms
- ✓ VerifyNow checks, paid one at a time
- ✓ Invoice pay links that clients open in the industry apps
- ✓ Paystack's signature is checked before any action

Optional on-chain escrow

- ✓ Chosen per purchase order: send an escrow PO
- ✓ USDC, a dollar stablecoin, held by a smart contract
- ✓ The supplier is paid when the buyer confirms delivery
- ✓ Rand settlement stays the default for South African trade

THE ESCROW PURCHASE ORDER, IN FIVE STEPS

Buyer creates the PO

PO and amount

Buyer funds it

USDC held by the contract

Supplier ships

paid to the supplier

It works like a trust account run by code: every step leaves a tamper-evident record.

Your business, *on their home screen.*

Industry packs come with installable web apps (PWAs). No app store: open the link and add it to the home screen. Each one reads from the same company books.

TradeAdvisor®

Owner, technician and client apps. Clients follow the job, sign quotes and pay invoices.

GymAdvisor®

Member app: classes, progress and account.

Clinic packs

Patient apps to book, see the diary, and follow rehab, charts, records or pets.

RetailAdvisor®

Shoppers pay at the till by QR or tap on the SA Member app.

ApparelAdvisor®

A buyer app for wholesale ranges and available-to-sell stock.

Clients pay invoices in the app.

The TradeAdvisor® client app shows the statement balance and every invoice, and clients pay issued invoices in the app with Apple Pay, card or EFT through Paystack.

TradeAdvisor® client and owner apps · sample book, fictional business

Locked down *by design.*

Security is layered, so no single control carries the load. Every request passes each layer before it touches company data.

Edge and transport HTTPS, an enforced Content-Security-Policy and rate limits on sensitive APIs.

Identity Privy sign-in by email, Google, Apple or wallet. Every API call carries a verified token.

Tenancy Company membership is checked on the server, and every query is scoped to that company.

Role permissions Eight roles, from owner to sales contractor. Critical writes need named roles.

Database Row-level security on every table. Browser keys get no direct access.

Audit and monitoring Sensitive actions go to an activity log, with health checks for operations.

Built for POPIA

The Protection of Personal Information Act asks that personal data is processed lawfully, kept secure and seen only by the right people.

Consent

Personal checks will not run without recorded POPIA consent.

Need to know

Company-scoped data, a role matrix, and Finance limited to owner and finance roles.

Minimal exposure

Only a short list of public routes answers without sign-in.

Safeguards

Signed webhooks and share links, server-only keys, and rate limits.

Sector depth, *same core.*

Switch on a pack from Company → Modules for +R199 a month each. Government programmes are set up by administrators. Practice and trade fees stay with your business.

02

PART 2

VetAdvisor® *for veterinary practices.*

The full showcase: the problems it solves, every feature, the client and vet apps, a day in the practice, and what it costs.

Great care. *Messy* admin.

Most practices keep clients in one book, animals in another and vaccine recalls on WhatsApp. VetAdvisor® puts vets, clients, animals and money on one system.

“Client and animal records are in different books.”

THE FIX One client register with every animal, the chart and pet medical aid.

“Vaccine recalls mean chasing on WhatsApp.”

THE FIX Vaccines linked to visits drive a recall list for the desk.

“Clients can’t book on their phone.”

THE FIX Clients book open slots in their own app for any of their pets.

“Pet medical-aid packs are built after the consult.”

THE FIX Packs drafted from attended visits, with co-pay on the app.

“Theatre and consults clash.”

THE FIX Exclusive vet books with consult rooms and theatre on one diary.

“Updates to owners go from personal phones.”

THE FIX In-app messages between desk, vets and clients.

From the first consult to *paid*, for every pet.

VetAdvisor® is the practice OS inside SupplierAdvisor® for vets, veterinary nurses and specialists. Vets run their day from a phone, clients book and track their pets in the practice app, and the money lands in your books.

People

Vets and nurses with contracts and rates, and one client book with animals.

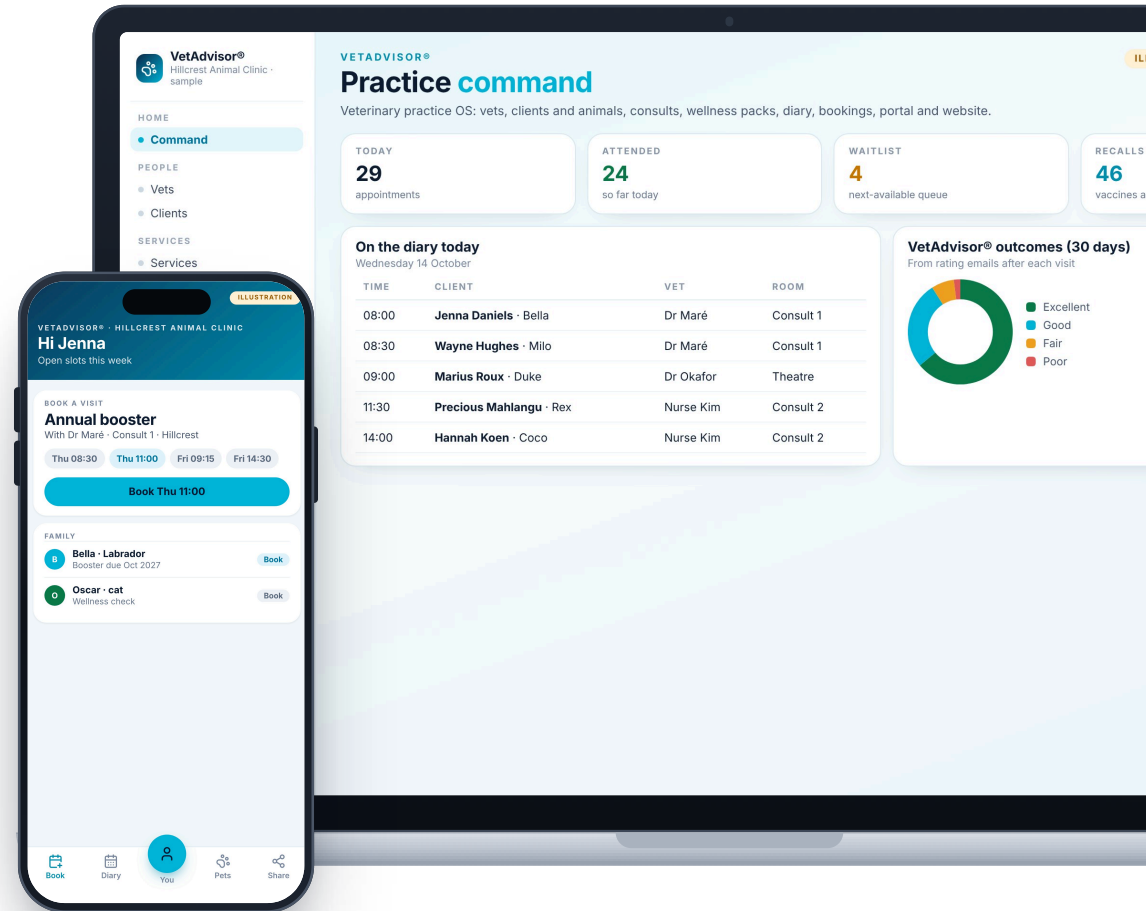

The diary

Exclusive books, rooms, theatre, waitlist and vaccine recalls.

Money

Pet medical aid from the visit, co-pays on the app and receipts in the ledger.

R199 /month

VetAdvisor® pack on top of the SupplierAdvisor® core plan

0 double-bookings

Exclusive vet books on a shared diary

2 apps

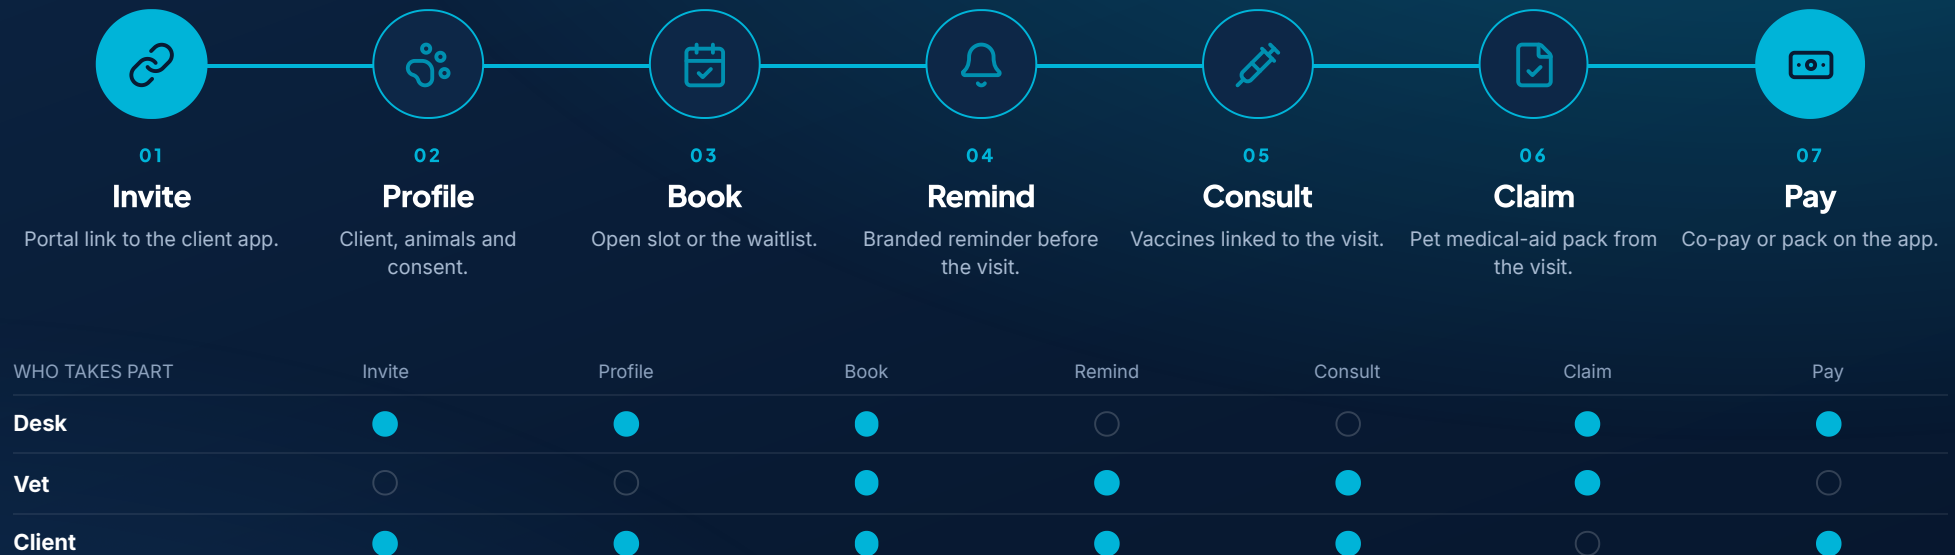

Client app and vet work app, installable from the browser

∞ users

Priced per company, so every vet is included

Seven steps. *One* client record.

Every visit runs on the same record, from the invite to the paid account. The desk, the vet and the client all see their part of it.

A shared diary, *without the double- bookings.*

One clinic diary by vet and room. Every vet has an exclusive book, so a slot can never be sold twice, and consult rooms and theatres let two people work at the same time.

Week, day and room view

Click an appointment to open it; click empty time to schedule.

Consult rooms and theatres

Add consult rooms and surgeries, attach equipment and optionally assign a room to a vet.

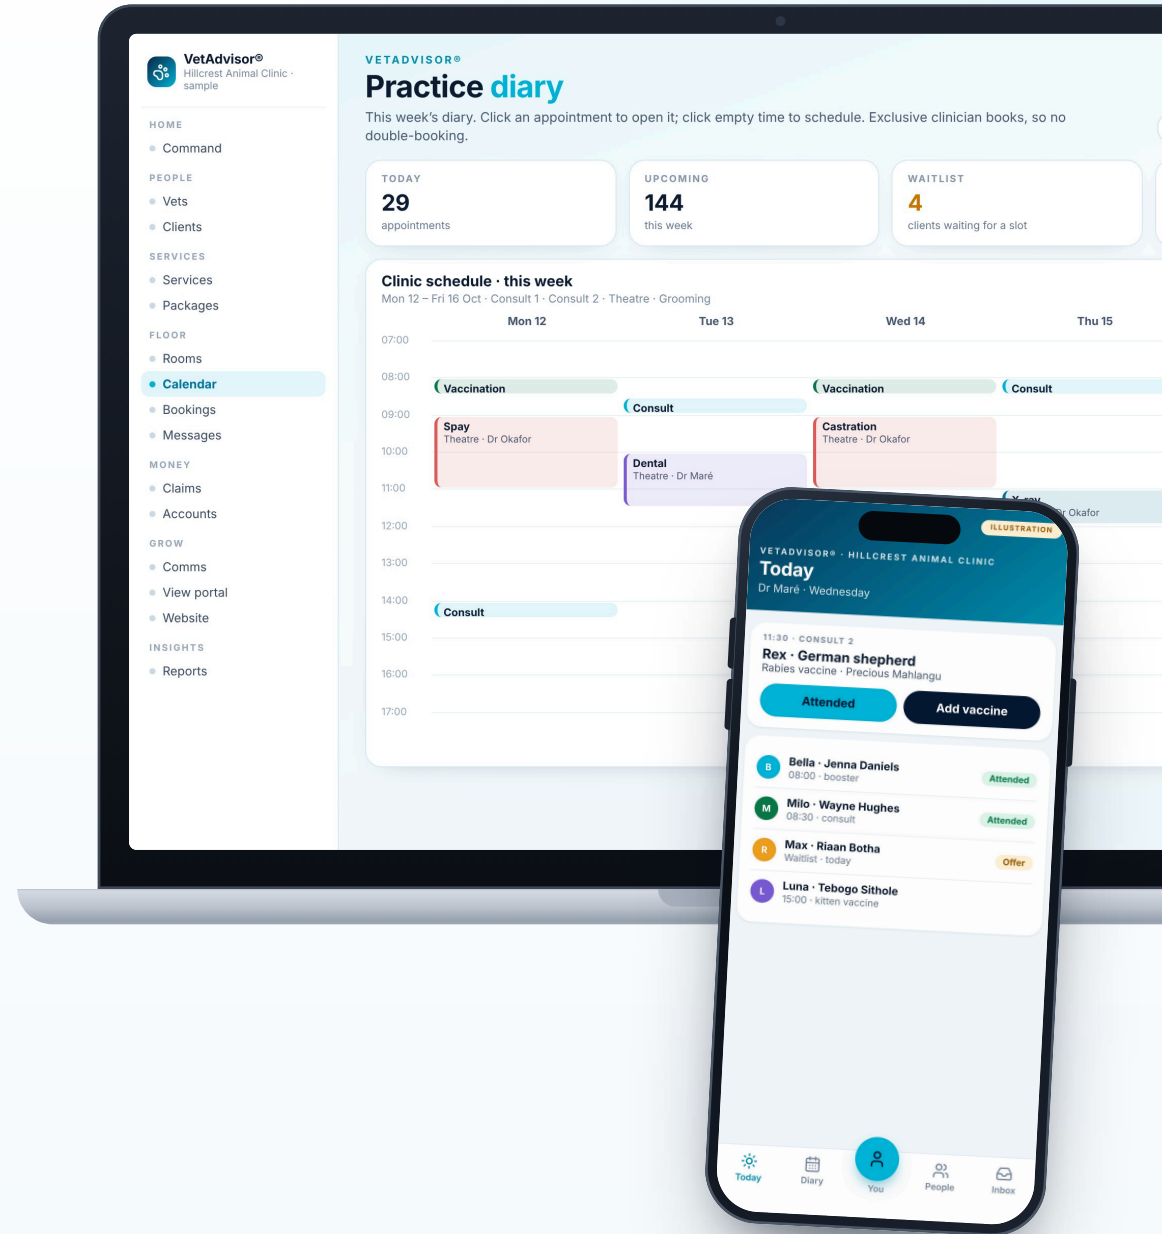

Working hours and closed days

Closed days are dimmed and the day view follows your open window.

Vets run their own diary

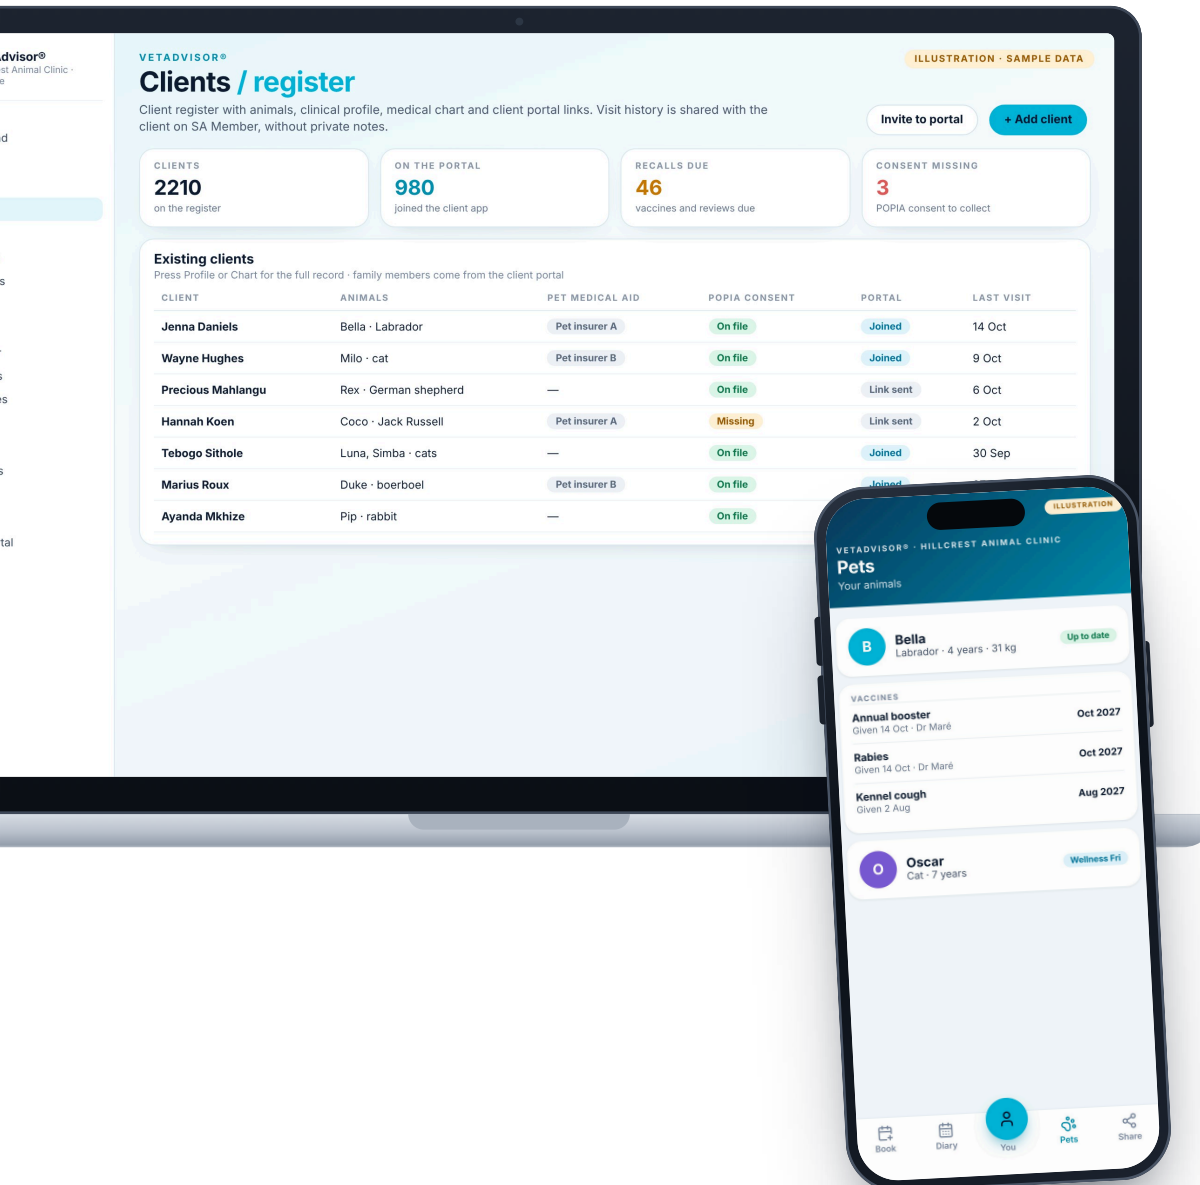

Each vet gets the work app: Today, Diary, People and Inbox.

Clients and animals *in one book.*

The client register holds every animal with the clinical profile, medical chart, scripts, pet medical aid and attachments. Clients see the same visit history on SA Member, without private notes.

-  **Client and animal profiles**
Demographics, animals, chart, scripts and attachments.
-  **Client portal link**
Clients see open diary vacancies and book themselves.
-  **POPIA consent on file**
Consent recorded on the client record, with a flag when it is missing.
-  **Visit history on the app**
Past and upcoming visits, without private notes.

Fewer gaps. *Fewer phone calls.*

Clients book open slots in their own app. The desk works a next-available waitlist, and recalls show who is due back.

Self-booking on the app

Clients see open diary vacancies and book themselves, family included.

Next-available waitlist

The desk offers a freed slot to the next person in the queue.

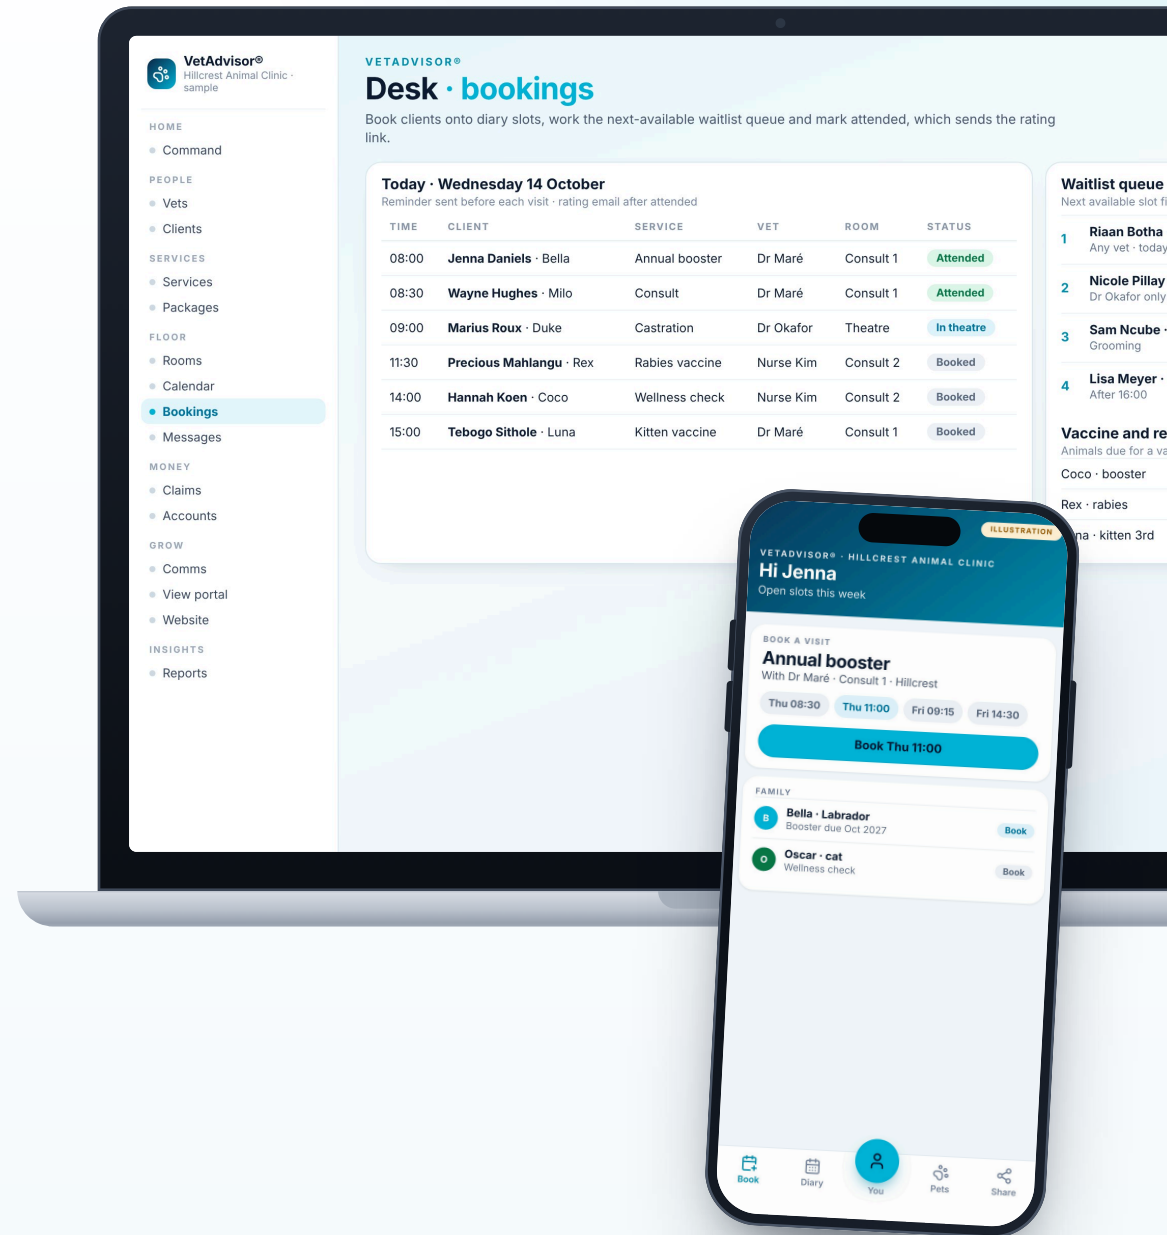

Reminder and rating email

A branded reminder before the visit and a rating email after it is marked attended.

Vaccine and review recalls

Vaccines linked to visits drive recalls, so animals due a booster are listed for the desk.

Every animal, *every* booster, on time.

Clients and their animals live on one register. Vaccines are linked to the visit, the next due date drives the recall list, and the client sees it all on the Pets tab.

Clients and animals together

One client record with every animal on it.

Vaccines linked to visits

Given at the consult, recorded on the chart.

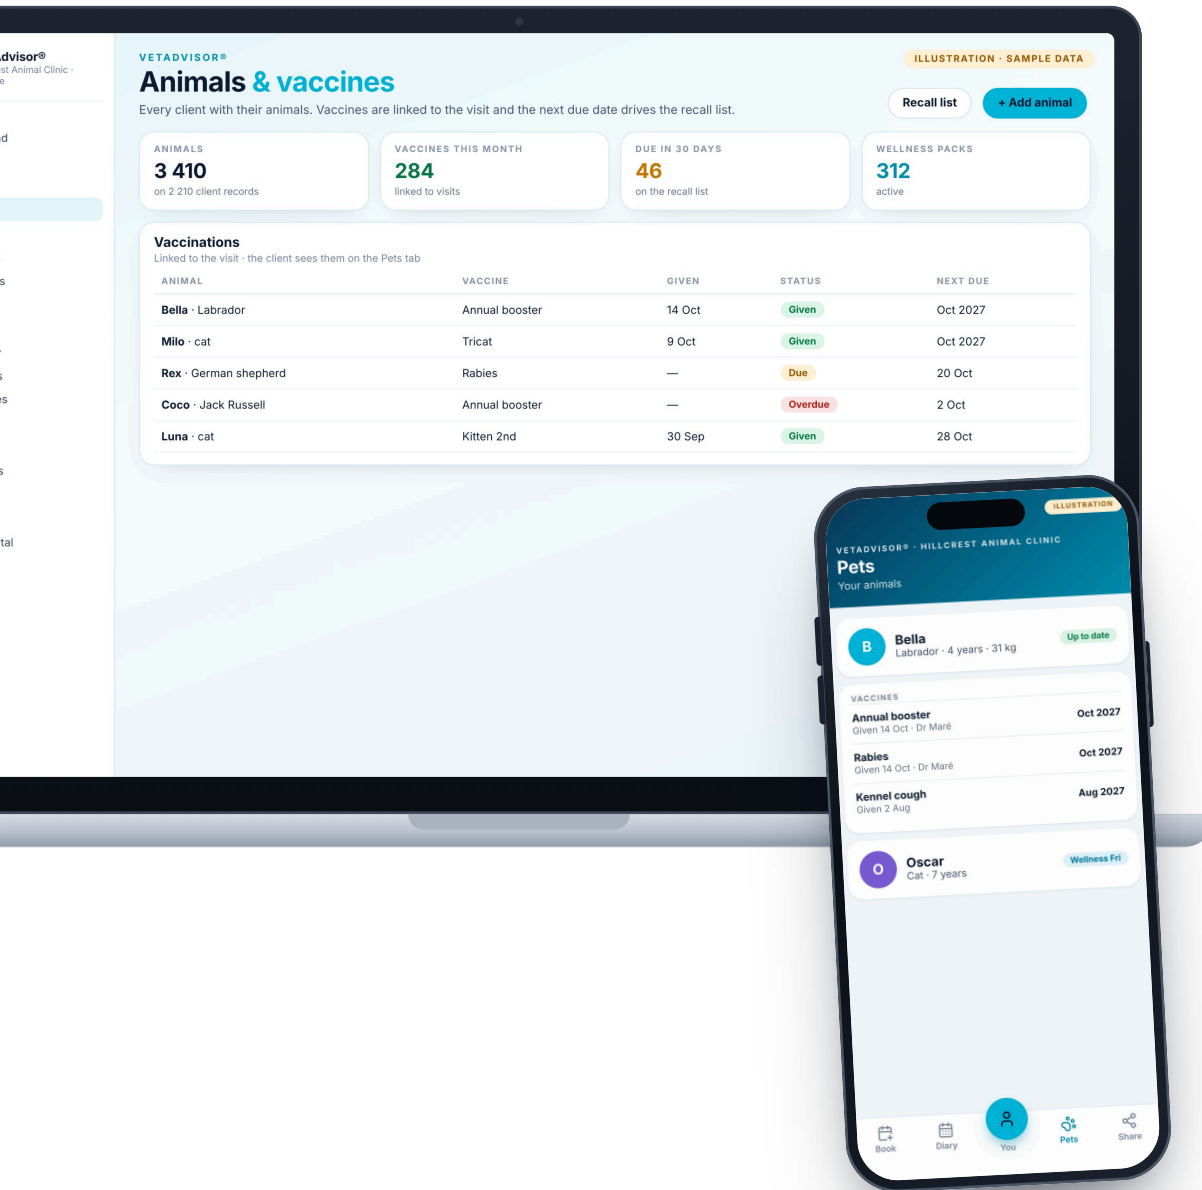

Vaccine recalls

Animals due a booster listed for the desk, with no WhatsApp chasing.

On the Pets tab

Clients see each pet's vaccines and visits on their phone.

Pet medical aid, *straight from the consult.*

Pet medical-aid packs are drafted from attended visits instead of being assembled afterwards. Any co-pay appears on the client's app to pay by card.

Packs from attended visits

The consult becomes the claim pack; nothing to re-key.

Checked before sending

Missing policy numbers are flagged first.

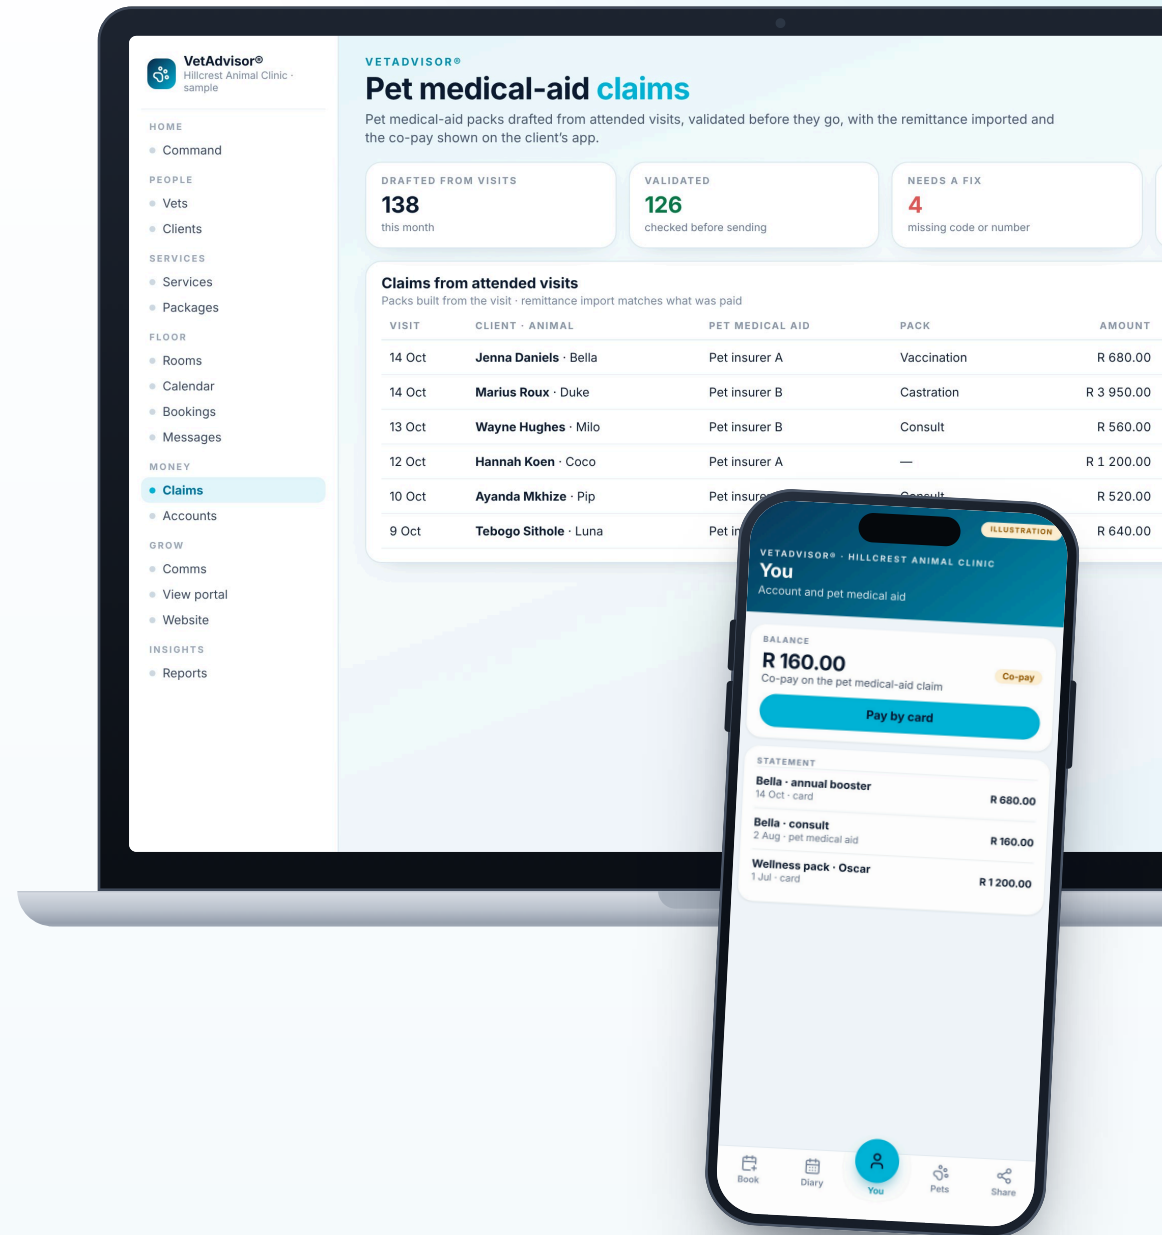

Submit and import

Submission in sandbox until accredited; the remittance is imported.

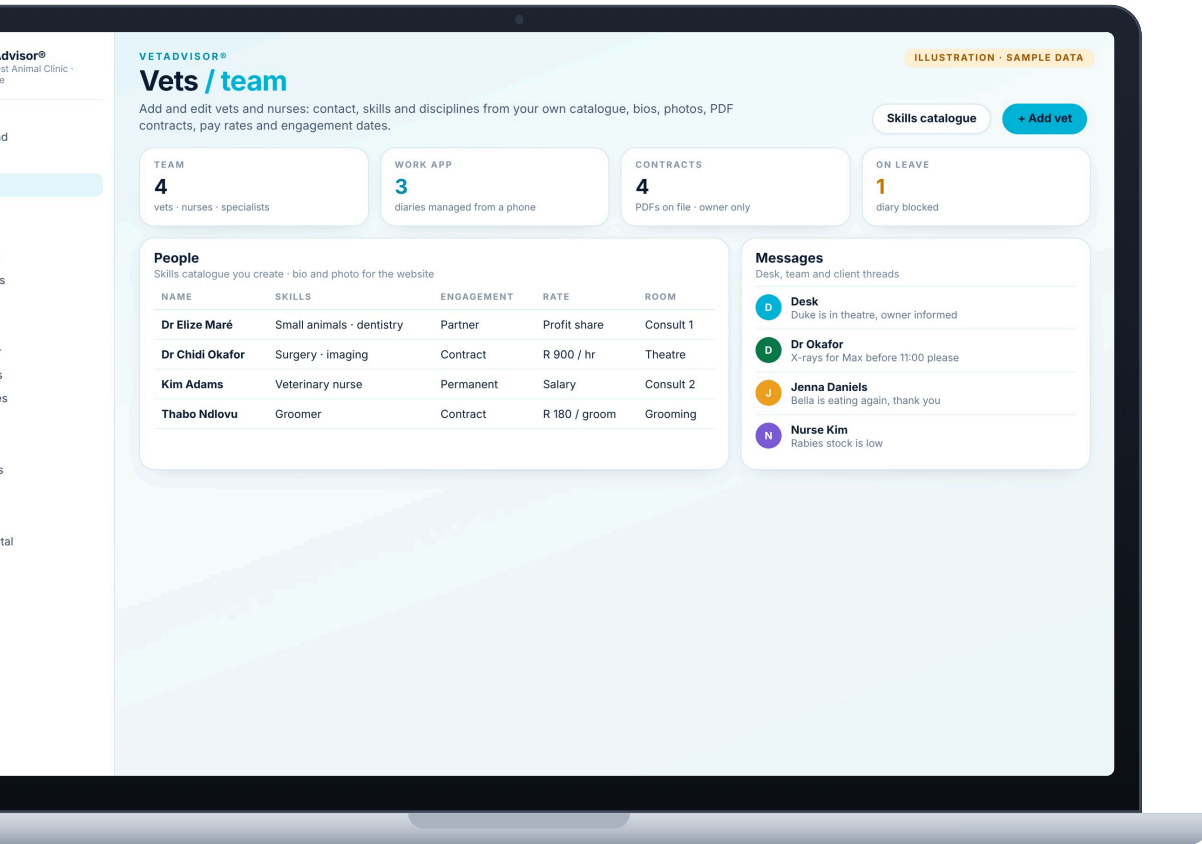

Co-pay on the app

Card / Apple Pay settles to your bank (1% admin), or proof of EFT.

Your team, *on one thread.*

Vets with skills, bios, photos, contract PDFs, rates and dates. Clinical hand-offs move into in-app messages instead of personal chat apps.

Vet profiles

Skills from a catalogue you create, bio and photo for the website.

Contracts and rates

Contract PDFs and pay rates, owner only and never on the public site.

In-app messages

Desk ↔ vet and vet ↔ client threads for care plans, scripts and follow-ups.

Leave and engagement dates

Start and end dates and leave that keep the diary honest.

Your brand on their phone, *your numbers on one page.*

Publish a branded home-screen app for clients and an optional public website with booking, then run the practice from one slicer and an A4 PDF pack.

Branded client app

Book · Diary · You · Pets · Share, installed from the browser.

Website and booking embed

Public profile, booking page and embed, plus a marketplace listing.

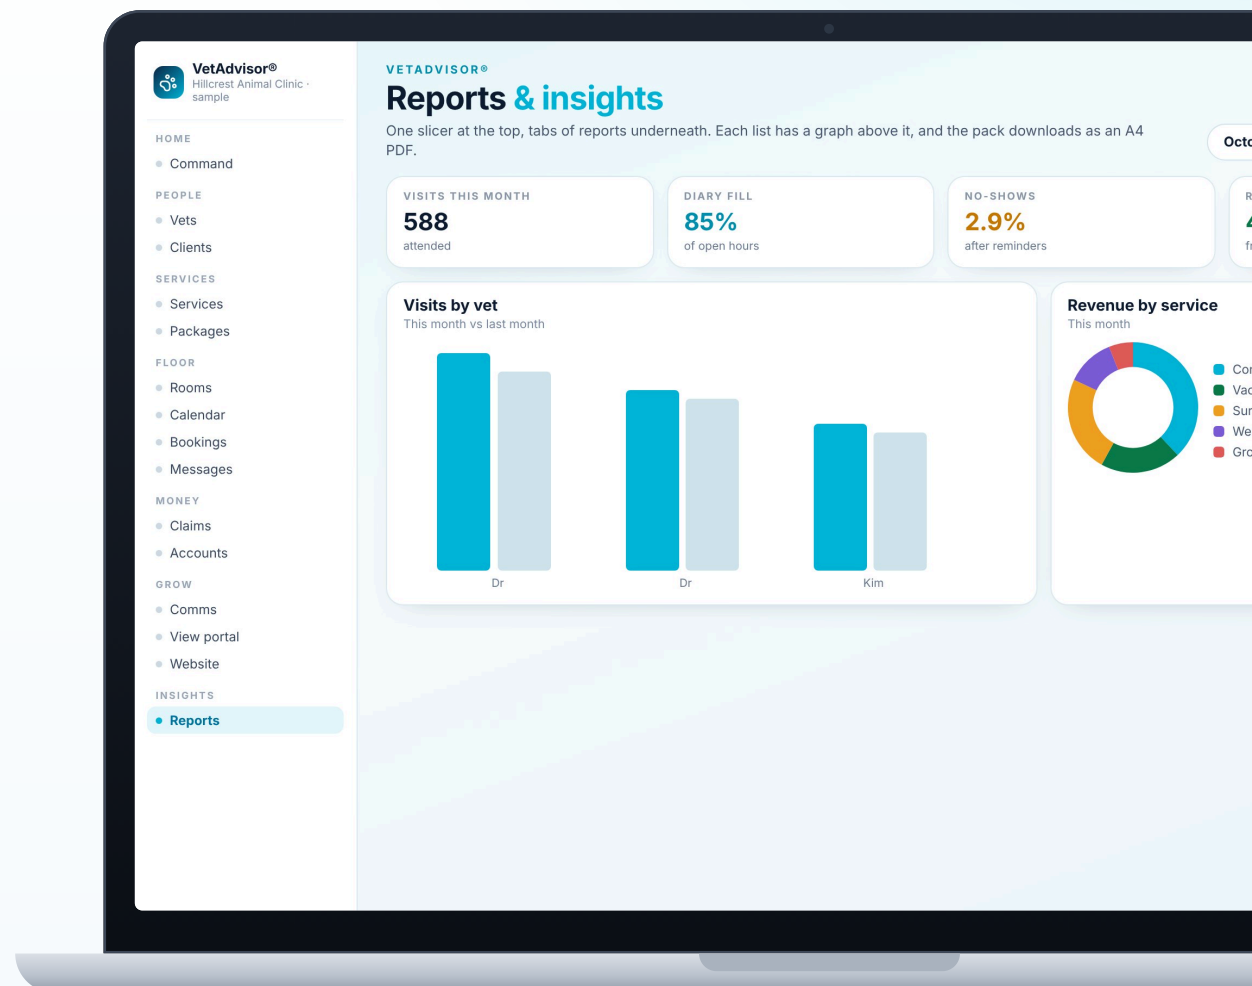

Comms

Push notices, ads and offers to every client on the portal.

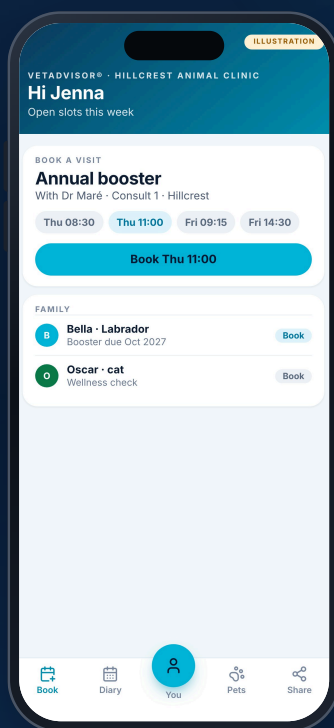

Reports and A4 PDF

Slice and dice visits, fill, no-shows and revenue, with trends.

One practice. *Every pet* in sync.

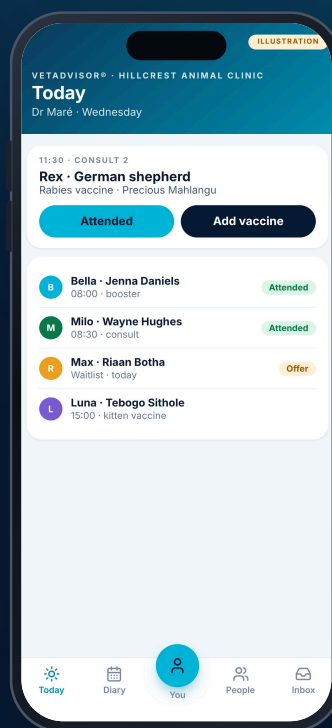

Each app opens in the browser and installs on the home screen as a progressive web app. No app store, nothing for your clients to set up.

CLIENT APP

Book and see

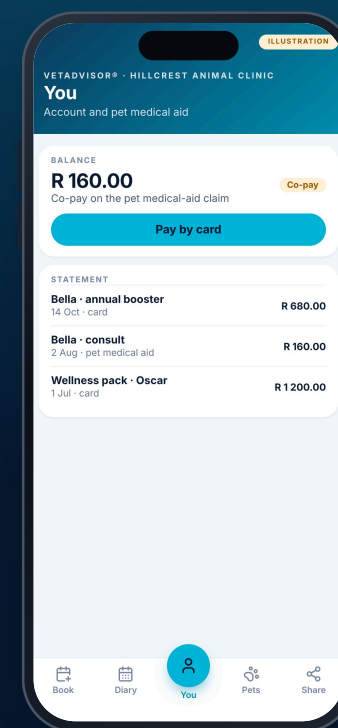

Book · Diary · You · Pets · Share: slots, family, visits and pets.

VET APP

Run the day

Today · Diary · You · People · Inbox: the day's list, clients and messages.

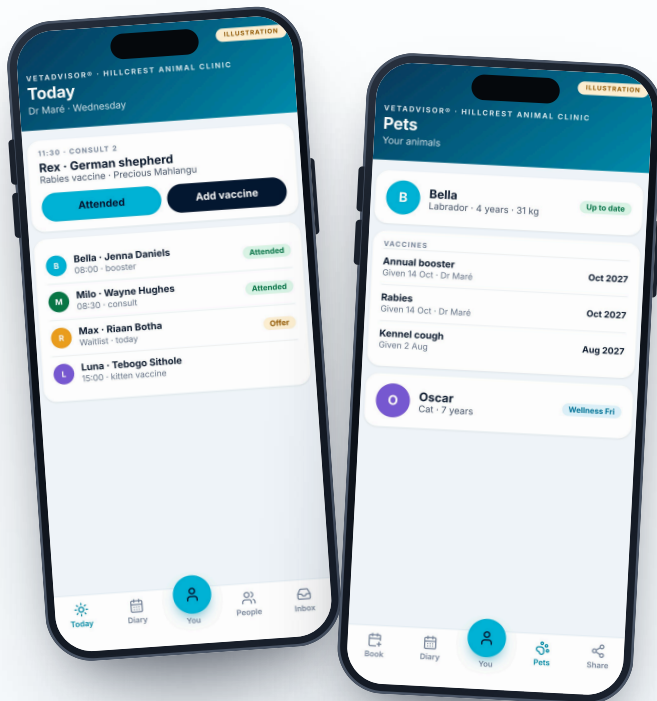

CLIENT ACCOUNT

See and pay

Balance, co-pay and statement, paid by card on the app.

A Wednesday at *Hillcrest Animal Clinic.*

An illustrative day with VetAdvisor®. Hillcrest Animal Clinic is a fictional practice with two vets, a nurse, a groomer and a front desk.

Illustrative story. The business, people and amounts are fictional sample data, not a real customer.

- 07:30** ● **Dr Maré**
Opens Today on her phone: twelve consults and two vaccines, and Duke is first in theatre.
- 08:00** ○ **Booster**
Bella gets her annual booster. The vaccine is linked to the visit and the 2027 recall is set.
- 09:00** ○ **Theatre**
Dr Okafor operates on Duke. The desk updates his owner in the client thread.
- 10:30** ○ **Desk**
A 16:00 slot frees up and the waitlist offers it to Max's owner, who books on the app.
- 12:00** ○ **Pet medical aid**
Duke's castration pack is drafted from the visit, ready to check.
- 14:00** ○ **Wellness**
Nurse Kim sees Coco, whose booster was overdue on the recall list.
- 16:00** ○ **Recalls**
46 animals are due in 30 days. The desk sends a Comms notice to their owners.
- 18:00** ● **Partners**
Reports show 85% diary fill and the A4 PDF pack is ready.

From cards, calls and WhatsApp *to one system.*

	Before: paper, WhatsApp, spreadsheets	With VetAdvisor®
Records	✗ Clients and animals in separate books	✓ One client register with every animal
Booking	✗ Phone calls	✓ Clients book open slots in their app
Vaccines	✗ A card in the file	✓ Vaccines linked to the visit, on the Pets tab
Recalls	✗ WhatsApp reminders by hand	✓ A recall list from vaccine due dates
Theatre	✗ A whiteboard	✓ Theatre and consult rooms on one diary
Pet medical aid	✗ Packs built after the consult	✓ Drafted from the attended visit
Owner updates	✗ Personal phones	✓ In-app client threads
Reporting	✗ Counting the diary	✓ Fill, no-shows and revenue with an A4 PDF pack

Built for South African practices, *on a real business system.*

A booking app stops at the appointment. VetAdvisor® also runs your animals, vaccines, pet medical aid, accounts and books on SupplierAdvisor®.

Real accounting underneath

Receipts post to the ledger, with bank matching, VAT and financial statements.

Clients and animals together

One register, every pet.

Vaccine recalls

Due dates from vaccines linked to visits.

Two apps included

A client app and a vet work app, no app store.

Theatre on the diary

Exclusive vet books, consult rooms and theatre.

Pet medical aid

Packs from the visit, co-pay on the app.

Website and marketplace

Public booking page, embed and listing.

Priced per company

Unlimited users. Add a locum vet without paying for a seat.

See it on your own data.

VETADVISOR® INDUSTRY PACK

+R199

 /month

On top of the core plan. Prepaid terms discount the pack by the same percentage.

Together: R498 a month

That is about R16.60 a day for the whole company, with no per-seat fees.

30-day free trial · no card

What R199 a month replaces

- ✓ A diary and booking app
- ✓ Separate client and animal books
- ✓ Vaccine cards and WhatsApp recalls
- ✓ Pet medical-aid packs by hand
- ✓ Co-pay invoices by email
- ✓ Owner updates on personal phones
- ✓ Month-end diary counts

VerifyNow checks are paid per check (R15 to R179, VAT inclusive) and are not part of the subscription. Prices from www.supplieradvisor.com/pricing, October 2026.

Try both free for 30 days.

Full access to SupplierAdvisor® and VetAdvisor®. No card needed to start.

Start your 30-day free trial →

Good questions, *straight answers.*

[Book a demo](#) 

[Start free trial](#) →

Q Do clients have to download an app?

No. The client app opens from a link and installs on the home screen as a progressive web app.

Q Is our data safe?

Every API call checks your sign-in and company role on the server, and the database refuses direct browser access. Consent is recorded on each record and data is handled with POPIA in mind.

Q Can clients have several pets?

Yes. Each client record holds all their animals, and they book for any of them from the app.

Q Does it handle pet medical aid?

Pet medical-aid packs are drafted from attended visits and the co-pay shows on the client's app. Submission runs in sandbox until accreditation.

Q What do clients see?

Their pets, vaccines, bookings and visit history, without private notes, plus their account.

Q How do clients pay?

Raise the charge on their account. They pay by card or Apple Pay on the app (settles to your bank, 1% admin), or upload proof of an EFT.

Q Do I need SupplierAdvisor® as well?

Yes. VetAdvisor® is an industry pack on the SupplierAdvisor® core plan, which also gives you accounting, suppliers and the SAM assistant.

Q How do vaccine recalls work?

Vaccines are linked to the visit with a next due date, and animals that are due are listed for the desk to contact.

Q Can we book theatre?

Yes. Theatre and consult rooms are diary resources and each vet has an exclusive book, so nothing is double-booked.

Q Can we put booking on our website?

Yes. Publish the practice profile, a public booking page and an embed, and list on the marketplace.

Your next consult: booked, vaccinated and *paid*, on one system.

Start a 30-day free trial with full access, no card needed. Switch on VetAdvisor® from Company → Modules and invite your first clients today.
